

To Whom it may Concern,

As my previous employment was [REDACTED], I decided to resign due to many reasons.

Poor Management that didn't take the time to listen to Drivers. Implementing an App for everything. You spent many hours a week ( unpaid ) consistently looking at this App for updates and changes, trying to keep up with everything , but mobile phones were forbidden in the driver's seat, which I understand.

Checking

Divinations

Roadworks

Safety updates

Hazard

Incident

Uniforms ECT

Whatever you wanted to discuss with your Depo Manager was all on an App. A revolving door of unhappy staff, no support at all.

Employees need to discuss matters with a human being, not fill out a form off the App and wait for an emailed response. The App has increased a very poor working moral which has led to a huge turn over of staff. I've never known staff to resign in large number before the App was put in place by [REDACTED].

So now I'm an Orange School Bus driver.

Do you now how great it is to know every child's full name, never on a Green Bus.

Do you know how great it is that you receive a good morning or goodbye and thank you? Green buses, you get [REDACTED]

Do you know how great it is to console and comfort a little pre-primary or kindy child as they are a bit scared about doing their first bus ride as well as the parents. Green buses, majority standing room only as its not cool to let small kids sit on a seat next to you.

Do you know what it's like to teach a small child to put on their seat belt and be able to issue a high 5 as a job well done. Green buses no seat belts

Do you know what its like to begin a wonderful repour with kids and parents as every one's life is so different and lives can be turned upside down over night, tragedies strike, illness, deaths, those hard times were compassion is required to accommodate on the odd occasion.

Do you know what it's like just transporting school children without the public on? Green buses, school and public, a breeding ground for drug deals, inappropriate behaviour, and sexual abuse, stranger danger. I can go on and on. We live in a very volatile world where sexual predators are every were.

Do you know what it feels like transporting the most precious cargo, school children? Green buses, money on the hoof, if they pay.

Do you know what it's like driving a bus without videoed camera footage to so call protect the driver and other school children. Green buses, encourage bad behaviour as there is no consequences for unacceptable, repeatable bad behaviour and the kids don't care about the cameras.

School children belong on Orange school buses, I bet the attitude of the kids arriving to school on an Orange school bus creates a happier, calmer learning environment for school teachers as well as themselves. Orange school buses offer safety and continuity morning and afternoon, Green buses a different driver morning and afternoon and mostly every day.
