

Term of reference 2a: We should follow and improve on the path the ACT has set.

2b: Allow Cannabis and cannabis products/extracts etc. to be on the Pharmaceuticals Benefit Scheme.

3c: Hemp should be an unrestricted industry due to so much potential. I.e. Hemp plastics, hemp cosmetics, hemp foods, hemp paper, hemp clothes, hemp building materials and more.

Hemp can grow quickly and provides more than other resources and produces less damage. I.e. Deforestation for paper.

We need a review of weed driving. Weed tests are unreliable and does not accurately measure impairment, only what remains in the system even when unimpaired.

There should be regulations that allow adults to grow up to 5+ cannabis plants for personal use whether recreational or medicinal.

Cannabis and hemp are widely accepted and used in other countries, we can learn from them.

We should look at cannabis legalisation, we definitely need cannabis decriminalisation and we need pardons for past cannabis criminal offences on a case to case basis.

We need more research and studies on cannabis in Australia.

Need more public and politician education on cannabis and hemp based on science and evidence.
