

The prices are far better through black market and the quality through legal "medical cannabis" is fairly terrible.. most of the cannabis is by far too dry and there's barely any quality control, plenty of people reporting getting mouldy cannabis etc. I've never once seen mould on cannabis in the black market.. the prices are seriously just stupid. \$149 for 10g? It's just a joke. Should be \$149 for an ounce at most.
