

I would like to place my opinion forward regards to the SBS for regional Schools. Living in Darkan and being a parent having to think about High School for my children. I find that having zoning through Darkan is not viable at all. Due to the amount of children in the Shire of West Arthur and no matter where they live, there should be a choice on where to send your child. Some children find going to larger schools difficult after coming from a small primary school. Children may also get anxiety. Some of the Smaller High Schools offer variety of education for what the child maybe interested in. We should be able to give our children the best option. Not being told to use the the only School available because of this so called zoning issue. SBS should also understand if children are halfway through their High Schooling to be place as complementary because of new children is not a fair proposition. All children should be given a priority seat on the buses, otherwise you are penalizing children with their education.
