

PETITION

I, Gregory Norman Hocking of
State of Western Australia, am the promoter of this petition which contains 804 signatures.

in the

PETITION IN RELATION TO COCKBURN CEMENT LIMITED

To the President and Members of the Legislative Council of the Parliament of Western Australia in
Parliament assembled.

We, the undersigned support action:

to limit dust and toxic gas emissions from the Cockburn Cement Limited (CCL) factory at Munster in the
City of Cockburn, and, in particular, by requiring CCL to:

- (i) stop burning coal at the facility (and preventing all polluting industries from doing so in the City of
Cockburn in the future);
- (ii) remove all coal stockpiles and remediate those areas;
- (iv) cover lime kiln dust waste dumps and shell sand stockpiles to prevent dust becoming airborne;
- (v) fully enclose its Portland cement operations to prevent cement dust escaping into the environment;
- (vi) install effective pollution reduction technology to significantly reduce the range and quantity of toxic
gases and particulates emitted from the kiln stacks at the facility.

And:

to require the Environmental Protection Agency to review the CCL's activities, determine safe pollution
limits for the factory and remove CCL from special legislation relating to the Kwinana Industrial Precinct
so effective regulation of its toxic gas and dust emissions in an urban area can be undertaken.
We therefore ask the Legislative Council to recommend to the Minister for the Environment to instruct his
department to implement the foregoing.

And your petitioners as in duty bound, will ever pray.
