

I, James Mumme,
545 signatures.

in the State of Western Australia am the promoter of this petition which contains

PETITION

To the Honourable the President and Members of the Legislative Council of the Parliament of Western Australia in Parliament assembled.

We, the undersigned residents of WA, oppose the construction of Waste to Energy incinerators to burn waste because these incinerators will threaten our air quality, health and environment. They waste valuable resources, increase climate change impacts and pose financial risks on our communities.

Instead we call on the State Government to

- impose mandatory regulation of dioxins and furans,
- investigate the quality of the air around the Kwinana strip with a view to full and continuous monitoring, auditing the findings and requiring compliance.
- support an urgent inquiry by the Environment and Public Affairs Standing Committee into the availability, operations and effectiveness or otherwise of recycling and composting industries and any impediments or barriers to their successful operations in WA.

And your petitioners in duty bound will ever pray.
