

I, Philip Lin, of
petition which contains ⁴³⁴434 signatures.

in the State of Western Australia, am the promoter of this

PETITION IN RELATION TO KWINANA INDUSTRIAL AIR BUFFER ZONE EXTENSION

To the President and Members of the Legislative Council of the Parliament of Western Australia in Parliament assembled.

We the undersigned residents of Western Australia are opposed to the extension of the Kwinana Industry Air Buffer zone in the Mandogalup area to 1500m from the ALCOA slurry ponds. The extension of the buffer zone:

- Represents a health risk to the population in the area;
- Has been developed without consultation with the local community and is almost exclusively developed to meet industry needs;
- Is in conflict with the area previously identified for future urban development and other land uses;
- Significantly reduced the value of the properties in the area; and
- Has denied the residents and business operators in the area with any natural justice, due process, recourse, or appeal.

Your petitioners therefore respectfully request the Legislative Council to call on the Government to consult with the residents before a final decision is made on the buffer zone, provide a copy of all reports, evidence, and a full list of reasons to support the decision to extend the buffer zone, and in the event that the buffer is extended to the 1500metre point, to fully compensate residents for the loss of the full market value of the properties and local businesses and quiet enjoyment of the area before the buffer extension was proposed.

And your petitioners as in duty bound, will ever pray.
