Rec 141 - CAP

(2)

141. The Inquiry recommends that urgent steps be taken to develop Memoranda of Understanding (MOU) between the Swan Valley Nyungah Community (SVNC) and those government agencies, which may reasonably seek access to that community. In developing those MOU, the conclusion of the Inquiry as to the good faith of service providers and their legitimate exercise of government function, ought to be taken into account.

The Government is currently negotiating conditions or agreement with the SVNC as to the use of that land and access to it by agencies. The ability of agencies to negotiate entry to this site will be the yardstick against which the success of this agreement can be measured.
