I refer to various contracts let for the construction and delivery of standalone power systems (SPS) and community batteries under the Minister's portfolio responsibilities, and ask:

- (a) Can the Minister list the various battery technologies used in the deployment of SPS and community batteries in any government contracts under his portfolio, including:

(d) Is the government aware that some battery technologies could in the future provide a strong value chain of locally supported jobs and mining interests more so than some other technologies:
