Statement of compliance

Honourable Stephen Dawson MLC
Minister for Environment

In accordance with section 63 of the Financial Management Act 2006, I hereby submit for your information and presentation to Parliament, the final Annual Report for the Department of Environment Regulation for the financial year that ended 30 June 2017.

The Annual Report has been prepared in accordance with the provisions of the Financial Management Act 2006.

Amanda Alderson
Reporting Officer

12 October 2017
The former Department of Environment Regulation (the Department) amalgamated on 1 July 2017 with the former Department of Water and the Office of the Environmental Protection Authority to become the Department of Water and Environmental Regulation (DWER). All existing functions of the former Department were transferred to DWER.

Following the amalgamation of the three agencies, a Change and Integration Program Office was established to coordinate the comprehensive change management program required for the newly amalgamated DWER.

Key elements of this program includes: facilitating the development of DWER’s Strategic Plan and shared values; implementation of an integrated business model and organisational structure; and overseeing the relocation of DWER to Joondalup in 2018.

This report is intended as the final Annual Report for the Department. During its final year of operation:

- The Department continued its reform agenda – focusing on a comprehensive risk-based approach to its core regulatory functions by building on its Regulatory Framework to provide assurance of effective regulation and improved transparency, via the publishing of Guidance Statements and other materials on its website.
- The Department undertook planning for the introduction of a container deposit scheme, which following consultation with stakeholders is expected to commence from 1 January 2019.
- The Department commenced preparations for reviewing waste levy policy and the operation of the Waste Avoidance and Resource Recovery Account with detailed work to follow in 2017–18 by DWER.
- Funds generated from the landfill levy delivered major programs including: $20 million to the Better Bins Kerbside Collection Program to improve local government kerbside waste systems; and $10 million to the Recycled Construction Products Program to promote the use of recycled construction and demolition (C&D) materials in civil construction projects. These and other programs support the achievement of recycling targets in the Western Australian Waste Strategy: Creating the Right Environment.
- The Department oversaw the monitoring program of rock art on the Burrup Peninsula for its protection against air pollutants.
- The Illegal Dumping Program – which was established to provide dedicated enforcement capacity to address illegal dumping across the State – became fully operational. In this reporting period, seven people were convicted of 14 offences of illegal dumping under the Environmental Protection Act 1986 (EP Act).
- The Department commenced the Light Industry Program – a joint initiative with local governments and the former Department of Parks and Wildlife (now the Department of Biodiversity, Conservation and Attractions) to reduce contaminants from light industrial and commercial activities to groundwater and drainage systems in the Swan and Canning river catchments.

Transition into the DWER will result in many changes for the Department. I congratulate all staff for the professional way in which they have managed the transition, as we move forward.

Amanda Alderson
Reporting Officer
12 October 2017
Executive summary

Three service areas

The Department had three service areas:

1. **Environmental regulation**: regulate activities with potential impacts on the environment.
2. **Environment policy**: develop and implement policies and strategies that promote environmental outcomes.
3. **Waste strategies**: reduce the impact of waste.

Major achievements for 2016–17 are discussed under Agency performance: highlights.

Operational structure

From 1 July 2016 to 11 March 2017, the Hon Albert Jacob MLA was Minister for Environment; Heritage (former Environment Minister) with responsibility for the Department. Following the Western Australian State Election on 11 March 2017, the Hon Stephen Dawson MLC was Minister for Environment (Environment Minister) with responsibility for the Department.

Responsible Minister

The Minister exercised authority under the EP Act, the Contaminated Sites Act 2003 (CS Act), the Waste Avoidance and Resource Recovery Act 2007 (WARR Act) and other department-administered legislation.

Organisational structure

Purpose

To advise on and implement strategies for a healthy environment, for all Western Australians.
Legislation administered at 30 June 2017

Copies of the legislation are available on the Department’s website and linked below. Legislation can also be accessed at State Law Publisher.

► Acts
Carbon Rights Act 2003
Contaminated Sites Act 2003
Environmental Protection Act 1986
Environmental Protection (Landfill) Levy Act 1998
Litter Act 1979
National Environment Protection Council (Western Australia) Act 1996

► Regulations
Clean Air (Determination of Air Impurities in Gases Discharged to the Atmosphere) Regulations 1983
Contaminated Sites Regulations 2006
Environmental Protection Regulations 1987
Environmental Protection (Abattoirs) Regulations 2001
Environmental Protection (Abrasive Blasting) Regulations 1998
Environmental Protection (Clearing of Native Vegetation) Regulations 2004
Environmental Protection (Concrete Batching and Cement Product Manufacturing) Regulations 1998
Environmental Protection (Controlled Waste) Regulations 2004
Environmental Protection (Domestic Solid Fuel Burning Appliances and Firewood Supply) Regulations 1998
Environmental Protection (Fibre Reinforced Plastics) Regulations 1998
Environmental Protection (Goldfields Residential Areas) (Sulfur Dioxide) Regulations 2003
Environmental Protection (Kwinana) (Atmospheric Wastes) Regulations 1992
Environmental Protection (Metal Coating) Regulations 2001
Environmental Protection (NEPM-NPI) Regulations 1998
Environmental Protection (NEPM-UPM) Regulations 2013
Environmental Protection (Noise) Regulations 1997
Environmental Protection (Packaged Fertiliser) Regulations 2010
Environmental Protection (Petrol) Regulations 1999
Environmental Protection (Recovery of Vapours from the Transfer of Organic Liquids) Regulations 1995
Environmental Protection (Rural Landfill) Regulations 2002
Environmental Protection (Unauthorised Discharges) Regulations 2004
Litter Regulations 1981
Noise Abatement (Noise Labelling of Equipment) Regulations (No. 2) 1985
Waste Avoidance and Resource Recovery Regulations 2008
Waste Avoidance and Resource Recovery Levy Regulations 2008

► Environmental Protection Policies
Environmental Protection (Peel Inlet - Harvey Estuary) Policy 1992
Environmental Protection (Kwinana) (Atmospheric Wastes) Policy 1999
Environmental Protection (Western Swamp Tortoise Habitat) Policy 2011
Changes made in 2016–17 to legislation administered

No amendments to legislation administered by the Department were made during 2016–17.

Other key legislation relevant to the Department

The Department was responsible for the implementation of seven National Environment Protection Measures (NEPMs) established under the National Environment Protection Council Act 1994 (Cwlth).

The Department reported annually to the National Environment Protection Council on the implementation of the following NEPMs:

- Air Toxics
- Ambient Air Quality
- Assessment of Site Contamination
- Diesel Vehicle Emissions
- Movement of Controlled Waste
- National Pollutant Inventory
- Used Packaging Materials

In the performance of its functions, the Department also complied with the following relevant written laws:

- Auditor General Act 2006
- Disability Services Act 1993
- Equal Opportunity Act 1984
- Financial Management Act 2006
- Freedom of Information Act 1992
- Industrial Relations Act 1979
- Minimum Conditions of Employment Act 1993
- Occupational Safety and Health Act 1984
- Public Sector Management Act 1994
- Salaries and Allowances Act 1975
- State Records Act 2000
- State Supply Commission Act 1991

Notices, Orders, Approvals and Refusals to Approve

Environmental Notices, Orders, Exemption Orders, Approvals and Refusals to Approve Draft Policy were made under legislation by the former Environment Minister and are available in the Western Australian Government Gazette.

During 2016–17, the following were approved by the former Environment Minister.

Under section 6(1)(b) of the EP Act:

- Environmental Protection (National Paint Product Stewardship Scheme) Exemption Order 2016 (published in the Western Australian Government Gazette No. 163 on 9 September 2016).

In accordance with the CS Act, section 97(4), the Department gave notice in the Western Australian Government Gazette No. 132 published on 30 June 2017 that the documents listed below (published by the Department) were for the making and revocation of guidelines for the purposes of the CS Act, section 97. The guidelines revoked under items 2–4 below were in relation to existing guidelines listed in Notice EV401, published in the Western Australian Government Gazette No. 234 on 29 December 2006, and Notice EV401, published in the Western Australian Government Gazette No. 154 on 10 August 2010.

1. Guidelines made for the purposes of section 97(1) –

- Assessment and Management of Contaminated Sites (Contaminated Sites Guidelines, Department of Environment Regulation, December 2014).
- Identification, Reporting and Classification of Contaminated Sites in Western Australia (Contaminated Sites Guidelines, Department of Environment Regulation, June 2017).
- National Environment Protection (Assessment of Site Contamination) Measure 1999 (made under section 14(1)(d) of the National Environment Protection Council Act 1994 (Cwlth) and section 14(1) of the National Environment Protection Council (Western Australia) Act 1996 (WA) and in force on 16 May 2013).
2. Guidelines revoked for the purposes of section 97(1)(a) –

Assessment Levels for Soil, Sediment and Water (Contaminated Sites Management Series, Department of Environment Regulation, February 2010).

Bioremediation of Hydrocarbon Contaminated Soils in Western Australia (Contaminated Sites Management Series, Department of Environment Regulation, October 2004).

Development of Sampling and Analysis Programs (Contaminated Sites Management Series, Department of Environment Regulation, December 2001).

Reporting on Site Assessments (Contaminated Sites Management Series, Department of Environment Regulation, December 2001).

The Use of Risk Assessment in Contaminated Site Assessment and Management: Guidance on the Overall Approach (Contaminated Sites Management Series, Department of Environment Regulation, November 2006).

3. Guidelines revoked for the purposes of section 97(1)(b) –

Potentially Contaminating Activities, Industries and Landuses (Contaminated Sites Management Series, Department of Environment Regulation, October 2004).

Reporting of Known and Suspected Contaminated Sites (Contaminated Sites Management Series, Department of Environment Regulation, November 2006).

Site Classification Scheme (Contaminated Sites Management Series, Department of Environment Regulation, November 2006).

4. Guidelines revoked for the purposes of section 97(1)(c) –

Community Consultation Guideline (Contaminated Sites Management Series, Department of Environment Regulation, November 2006).

Modified penalties

Under section 99E of the EP Act, the Department was required to publish notice of payment of any modified penalties during the financial year in its Annual Report.

The following modified penalties were issued and paid in 2016–17:

<table>
<thead>
<tr>
<th>Modified penalty notice</th>
<th>Issued to</th>
<th>Reason</th>
<th>Offence date</th>
<th>Fine paid</th>
</tr>
</thead>
<tbody>
<tr>
<td>Modified Penalty Notice 5/16</td>
<td>BHP Billiton Nickel West Pty Ltd</td>
<td>Breach licence condition at the Kambalda Nickel West Concentrator</td>
<td>5 December 2015</td>
<td>$12,500</td>
</tr>
<tr>
<td>Modified Penalty Notice 6/16</td>
<td>Avoca Mining Pty Ltd</td>
<td>Causing environmental harm committed at Higginsville Gold Mine</td>
<td>14 February 2016</td>
<td>$25,000</td>
</tr>
<tr>
<td>Modified Penalty Notice 1/17</td>
<td>Chichester Metals Pty Ltd</td>
<td>Causing environmental harm committed at the Cloudbreak Iron Ore Mine</td>
<td>15 May 2015</td>
<td>$25,000</td>
</tr>
</tbody>
</table>
### Outcome-based management framework

The Department directly contributed to the State Government’s strategic goals – specifically social and environmental responsibility – ensuring that economic activity was managed in a socially and environmentally responsible manner for the long-term benefit of the State.

The following table illustrates the relationship between the Department’s services and desired outcomes, and the government goal it contributes to. The key effectiveness indicators measure the extent of impact of the delivery of services on the achievement of desired outcomes. The key efficiency indicators monitor the relationship between the service delivered and the resources used to produce the service.

<table>
<thead>
<tr>
<th>Desired outcome</th>
<th>Environmental regulation</th>
<th>Service 2</th>
<th>Service 3</th>
</tr>
</thead>
<tbody>
<tr>
<td>Emissions, discharges and clearing of native vegetation are effectively regulated to avoid unacceptable risks to public health and the environment</td>
<td>Regulate activities with potential impacts on the environment</td>
<td>Develop and implement policies and strategies that promote environmental outcomes</td>
<td>Reduce the impact of waste</td>
</tr>
<tr>
<td>Development and implementation of strategic policy and legislation that promoted sustainable environmental outcomes</td>
<td>Waste avoided and the recovery of materials from landfill maximised</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

#### Key effectiveness indicators

- Percentage of major resource project works approvals and licences applications decided within 60 working days
- Percentage of other project works approvals and licences applications decided within 60 working days
- Percentage of native vegetation clearing permit applications decided within 60 working days
- Percentage of investigations finalised within 60 working days
- Percentage of advice and recommendations that met Ministerial approval, without the need for significant modification
- Percentage of municipal solid waste reported as diverted from landfill through recycling compared to the waste strategy target in the Perth metropolitan region
- Percentage of commercial and industrial waste reported as diverted from landfill through recycling compared to the statewide waste strategy target
- Percentage of construction and demolition waste reported as diverted from landfill through recycling compared to the statewide waste strategy target

#### Key efficiency indicators

- Average Cost per Works Approval and Licence Application
- Average Cost per Native Vegetation Clearing Permit Application
- Average Cost per Hour of Policy Advice and Recommendations
- Cost of landfill levy compliance as a percentage of landfill levy income collected
Agency performance
Agency performance

In its fourth and final year of operation, the Department had a number of significant achievements during 2016–17.

Air quality services

To better understand dust issues at Point Samson and at Port Hedland, including the location of dust sources and the movement of dust plumes in the air, the Department undertook separate dust monitoring studies during 2016–17 using Light Detection And Ranging (LiDAR) technology. The LiDAR mapped particle plumes every 10 minutes over a circular area in a six kilometre radius. To support each study, a particle monitoring network providing real-time particle information from key locations was implemented. The reports of the results of these studies will be published by the DWER during 2017–18.

The Department also commenced a 12-month field trial of a vehicle-mounted Remote Air Pollution Infrared Detector (RAPID) in November 2016. The RAPID provides a stand-off monitoring capability and is able to detect 87 air toxics through the use of an infrared detector that can automatically monitor and identify industrial chemicals, providing reliable identification of gas plumes at a distance of up to five kilometres.

Environmental Protection Regulations 1987

The Department began a review of schedule 1 of the Environmental Protection Regulations 1987 (EP Regulations) to clarify the application of the regulations and waste levy to development sites.

The intent of the regulation amendments is to ensure that the use of clean fill for development, which has historically not been subject to the waste levy, can continue without attracting the levy.

The amendments will also ensure that waste-derived uncontaminated fill which has been tested to show that it meets environmental and health standards can be used without being subject to the waste levy. Amendments to the Landfill Waste Classification and Waste Definitions 1996 (as amended December 2009) will support these amendments.

The DWER will undertake targeted stakeholder consultation on the proposed amendments to the EP Regulations.

Waste avoidance and resource recovery

The Department is developing amendments to the Waste Avoidance and Resource Recovery Regulations 2008 (WARR Regulations) to require reporting and record-keeping of waste and recycling data by local governments, waste recyclers and licensees of major regional landfills.

The Western Australian Waste Strategy: Creating the Right Environment, published in March 2012, set out strategic directions and priorities for waste management in Western Australia and established targets for diversion of waste from landfill.

To assess Western Australia’s performance against the landfill diversion targets in the waste strategy and to report against budget key performance indicators, waste and recycling data are collected annually from local government and industry in Western Australia. Through its administration of the waste levy, the Department collects data on waste disposed of to landfill. Data are also provided voluntarily through the annual Local Government Waste and Recycling Census and the Recycling Activity Review, which annually surveys businesses that recycle materials.

The provision of waste and recycling data on a voluntary basis has resulted in an incomplete dataset due to variable response rates, reducing the effectiveness of assessment of progress against the targets.

The Department’s consultation paper on the proposed amendments was released for stakeholder consultation from 1 July 2016 to 26 August 2016. Twelve submissions were received, comprising of:
five individual local governments;
one regional council;
two associations (Western Australian Local Government Association and Waste Management Association of Australia); and
one waste contractor, one waste recycler, one individual, and one consultant.

A paper with the analysis of stakeholder submissions and recommendations for the proposed amendments was published on the Department’s website in June 2017.

Stakeholder submissions will inform the regulatory amendments required to give effect to the data reporting requirements. The DWER intends to develop methods for measurement and calculation, as well as guidance on direct waste measurement techniques and other estimation methodologies. Draft methods will be developed in consultation with stakeholders. The requirement to report data will not commence until the relevant method has been approved.

Programs

The Department’s existing programs had the following achievements:

- The BurnWise program continued to promote responsible wood heater operation. Workshops were delivered to local government environmental health officers to provide support and tools to reduce the impacts of wood smoke in communities.
- The CleanRun program consists of targeted initiatives to reduce vehicle emissions. The Smoky Vehicle Reporting Program received 479 valid reports between 1 July 2016 and 30 June 2017, resulting in 388 letters being sent to registered vehicle owners. Seventy per cent of letter recipients provided a response to the letters, with nearly half advising they had repaired their vehicle since being reported.
- The Department worked with industry to collect, validate and provide publicly available emissions and transfers data from 811 industrial facilities in Western Australia through the National Pollutant Inventory database.

The Department supported the Waste Authority by delivering initiatives as part of the Western Australian Waste Strategy: Creating the Right Environment, including:

- Better Bins Kerbside Collection Program – a $20 million program to support local governments to introduce best practice kerbside collection systems. Ten local governments participated in the Better Bins Program during the year and $1.87 million was expended on the program.
- In December 2016, a project to develop a toolkit of communication and engagement materials to be used by local governments participating in the Better Bins Program commenced.
- Recycled Construction Products Program – a $10 million incentive program for local governments, state government entities, regional councils and the private sector to use recycled construction and demolition products in civil construction, such as roads.
- Charitable recyclers support to reduce the impact of the levy. In 2016–17, seven organisations received rebates worth over $280,000 through the program.
- Household Hazardous Waste program – $1.95 million to provide funding to local governments to support the collection, storage and disposal of hazardous waste generated by households.
- The Community and Industry Engagement program, which commenced in 2016–17, supports organisations that promote better waste management behaviours, practices and awareness. Two funding rounds provided $554,700 to support 17 projects.
- The Community Grants Scheme program supports community groups to reduce waste generation, recover resources and reduce the impact of waste on the environment. There were two funding rounds delivered in 2016–17 which provided $185,673 to 23 projects.
- The Clean Communities program, which was trialled in 2016, provided collection bags in Australian standard bin colours to volunteer community litter collection groups to enable source separation of the waste collected. Eligible groups were able to claim grant payments of up to $500 for the waste and recycling they collected during the trial.
National Paint Product Stewardship Scheme

The National Paint Product Stewardship Scheme (Paintback) commenced in May 2016 to encourage painters to appropriately dispose of small amounts of architectural and decorative liquid waste paint at participating waste facilities. The Paintback scheme is funded by a $0.15 per litre levy on the sale of architectural and decorative paint approved by the Australian Competition and Consumer Commission. The scheme is being implemented by Paintback Limited, a company established by the Australian Paint Manufacturers’ Association.

In order to encourage participation in the scheme, the Environmental Protection (National Paint Product Stewardship Scheme) Exemption Order 2016, published in the Western Australian Government Gazette on 9 September 2016, removes the carrier licence requirement under the Environmental Protection (Controlled Waste) Regulations 2004 for the transport of 100 litres or less of liquid waste paint. The Exemption Order only applies to trade painters participating in Paintback and complying with the requirements set out in the Order.

The scheme is expected to contribute to the delivery of the State Government’s aim of diverting waste from landfill and protecting the environment.

Report on operations

The Department’s performance against the three service areas, and key efficiency and effectiveness indicators, are outlined in this Annual Report.

Information on the Department’s Regulatory Performance is published each quarter on the following functions:

- works approval and licence applications;
- native vegetation clearing permit applications;
- contaminated sites;
- environmental compliance;
- controlled waste licence applications; and
- environmental enforcement.
Service 1: Environmental regulation

The Department adopted a multi-faceted approach to delivering its regulatory role, which broadly fits into three main functions:

- approvals and licensing;
- monitoring, audit and compliance inspections; and
- enforcement, including complaint and incident investigation.

Licensing and approvals

The Department assesses, determines and/or advises on environmental licences and approvals in the areas of:

- industry regulation;
- contaminated sites regulation;
- clearing regulation; and
- noise regulation.

Core regulatory instruments include works approvals, licences, classifications, and clearing permits. These are assessed and determined in accordance with statutory and target timeframes. Performance against timeframes is reported quarterly on the Department’s website (Regulatory Performance).

Compliance and enforcement

The Department investigated environmental complaints and incidents as well as undertaking a wide range of proactive compliance programs and initiatives to ensure emissions and discharges met acceptable criteria.

The Department’s compliance and enforcement activities foster a balance of proactive engagement and the application of sanctions, as appropriate, to ensure the risks associated with environmental breaches are addressed and instruments contain robust regulatory controls.

Compliance and enforcement outcomes range from licence amendment, suspension or revocation, statutory notices, and orders to modified penalty fines and prosecution.

Compliance and enforcement activities and outcomes are reported quarterly on the Department’s website.

(1) As specified in the 2016–17 Budget Statements.
(2) Further explanations are contained in the key performance indicators section of this Annual Report.
Industry regulation

During 2016–17, the Department received 200 applications for new works approvals and licences, and granted 94 applications and refused one application. The Department’s average time for determining an application for a new works approval or licence (excluding clock-stops) was 65 working days. Of the applications for new works approvals and licences determined by the Department in 2016–17, 59 per cent were decided within the 60 working day target timeframe.

The Department also received 389 applications to amend a works approval or licence and granted 342 amendment applications during the 2016–17 year. The Department’s average time for determining an application to amend a works approval or licence (excluding clock-stops) was 68 working days. Of the amendment applications determined by the Department in 2016–17, 68 per cent were decided within the 60 working day target timeframe.

As part of the reform process, the Department published or amended a number of important Guidance Statements, including:

The risk-based framework improves the accountability, transparency, robustness and effectiveness of environmental regulation in Western Australia.

During 2016–17, the Department also initiated a program of its ongoing review of existing licences consistent with its Guidance Statement: Licence Duration. These reviews ensured the Department’s regulatory instruments remained contemporary and effective to control public health and environmental risks.

Clearing regulation

The assessment bilateral agreement commenced on 1 January 2015 to accredit the State’s clearing permit assessment carried out under the EP Act under the Environment Protection Biodiversity Conservation Act 1999 (EPBC Act). A total of eight clearing permit applications were bilaterally assessed in 2016–17, and two decisions were made on applications assessed under the bilateral agreement.

The Department continued to support negotiations for an approval bilateral agreement. The agreements are part of the Federal Government’s ‘one-stop-shop’ for environmental approvals. The execution of the approval bilateral agreement is dependent on amendments to the EPBC Act which are not supported by the Senate. Amendments are also proposed to the EP Act to facilitate implementation of the approval bilateral agreement.

During 2016–17, the Department received 461 applications for a clearing permit and made 392 decisions. The average timeframe to make a decision (excluding clock-stops) was 34 working days. Of the decisions made on applications for a clearing permit by the Department in 2016–17, 71 per cent were made within the target timeframe of 80 per cent of decisions within 60 working days. The target timeframe for deciding a clearing permit application was altered from calendar days to working days at the beginning of 2016–17.

Compliance and enforcement

The Department received 2,893 complaints in Western Australia in 2016–17.

The Department dealt with 420 pollution incidents of which 281 required a clean-up of discharged waste. Fifty-eight of the incidents were classified as hazardous materials emergencies where the Department provided an on-scene environmental monitoring service and advice to the emergency services. Incidents included hazardous materials fires, chemical spills from premises and vehicles, sewage spills, oil spills, and airborne industrial emissions.

Proactive compliance activities are coordinated through the Annual Compliance Program. The Department undertook compliance activities across four major programs: prescribed premises compliance; waste compliance; controlled waste compliance; and pollution response activities.
Ninety-three per cent of the Department’s 1,245 planned inspections were undertaken in 2016–17. The Department administered 250 environmental sanctions, including environmental field reports, infringement notices, formal warnings, and prosecutions.

During 2016–17, the Illegal Dumping Program continued to deliver tailored education, surveillance and enforcement initiatives aimed at reducing illegal dumping. Strategic partnerships are now formalised with 11 local government authorities, Main Roads Western Australia, Landcorp, the Waste Authority, and the Keep Australia Beautiful Council. A total of 335 complaints of illegal dumping were investigated, and seven people were convicted of 14 offences under the EP Act with fines totalling $69,000.

**Noise regulation**

In its role of supporting Western Australian local governments administering the *Environmental Protection (Noise) Regulations 1997*, the Department provided formal noise assessment advice, data analysis and/or reports to local governments on 46 occasions.

The Department also approved a noise management plan for waste collection within a specified area of the City of Perth central business district.

Training in noise regulation was provided by the Department to local government authorised persons and inspectors in July, August and November 2016 as well as May 2017.

**Air quality services**

During 2016–17, the Department continued the maintenance and operation of eight metropolitan and five regional fixed air quality monitoring stations, to assess the presence of NEPM criteria pollutants, including carbon monoxide, nitrogen dioxide, ozone, sulfur dioxide, and particles.

All of the Department’s monitoring sites operating for the full 2016–17 period achieved a greater than 90 per cent data recovery. During this reporting period, the progressive upgrade of criteria pollutant monitoring equipment used at the Department’s monitoring stations continued.

In addition to the air quality monitoring required under the Ambient Air Quality NEPM, the Department undertook two Light Detection And Ranging (LiDAR) studies, at Point Samson from December 2016 to January 2017, and at Port Hedland from February to June 2017. The LiDAR mapped particle plumes every 10 minutes over a circular area in a six kilometre radius. To support each study, a particle monitoring network providing real-time particle information from key locations was implemented. Reports on the studies will be published during 2017–18.

The Department commenced a 12-month field trial of a vehicle-mounted Remote Air Pollution Infrared Detector (RAPID) in November 2016. The RAPID provides a stand-off monitoring capability and is able to detect 87 air toxics through the use of an infrared detector that can automatically monitor and identify industrial chemicals, providing reliable identification of gas plumes at a distance of up to five kilometres.

Specialist technical air quality advice was provided in response to more than 150 requests, with more than 95 per cent delivered within specified timeframes. The advice supported the Department’s regulatory functions, and the statutory functions of other government agencies.

The Department participated in the Collie Airshed Study – an industry-funded study to develop a consistent assessment and air quality management regime for the Collie basin, including a comprehensive meteorological database and a verified air quality model. During 2016–17, the Department successfully applied for access to the Pawsey Supercomputer Centre – a world class user facility based in Western Australia. The Department is running advanced three-dimensional weather models on the Pawsey computers, to simulate meteorology for the Collie region at a fine resolution.

**Contaminated sites**

The reported sites register listed almost 3,550 sites classified in accordance with the CS Act by 30 June 2017.

A Hazard Abatement Notice was served on the owners of 20 Adelaide Street Hazelmere in December 2016 to prevent access to the site and allow the fire risk to be managed.
The Department develops and implements strategic policy and legislation to promote environmentally sustainable outcomes.

Under the EPBC Act, the Department continued to support:

- negotiations for an approval bilateral agreement with the Federal Government to accredit the clearing permit process as part of a ‘one-stop-shop’ to reduce duplication of environmental assessment and approval processes between Commonwealth and State territories; and
- the strategic assessment of the impact of development in the Perth and Peel regions on matters of national environmental significance.

The Department continued to implement:

- the provision of data to the National Pollutant Inventory, a publicly accessible national internet database that provides the community, industry and government with information on the emissions of 93 selected substances from industry, transport and commercial premises to air, land and water. The Department worked with industry to collect, validate and provide publicly available emissions and transfers data from 811 industrial facilities in Western Australia;
- the BurnWise program to promote responsible wood heater operation. BurnWise provides support and tools for environmental health officers to reduce the impacts of wood smoke in their communities. The BurnWise program delivered workshops to promote correct wood heater operation, and provided support and tools to local government environmental health officers to help reduce adverse impacts on air quality from wood heater smoke. BurnWise program officers attended community events at regional centres with the BurnWise wood heater demonstration trailer; and
- the CleanRun program to address vehicle emissions. CleanRun is an implementation measure of the National Environment Protection (Diesel Vehicle Emissions) Measure and the Perth Air Quality Management Plan, consisting of targeted initiatives to reduce vehicle emissions including on-road vehicle emissions testing and smoky vehicle reporting. The Smoky Vehicle Reporting Program received 479 valid reports between 1 July 2016 and 30 June 2017, resulting in 388 letters being sent to registered vehicle owners. Seventy per cent of letter recipients provided a response to the letters, with nearly half advising they had repaired their vehicle since being reported.

\(^{(2)}\) Further explanations are contained in the key performance indicators section of this Annual Report.
Policy advice

In this reporting period the Department:

- Continued to participate in the implementation of the National Clean Air Agreement, including reviewing national reporting standards for sulfur dioxide, nitrogen dioxide and ozone, and finalising the introduction of standards for non-road ignition engines and equipment.
- Continued to administer the Perth Air Quality Management Plan in consultation with the Air Quality Coordinating Committee.
- Oversaw the monitoring program of rock art on the Burrup Peninsula for its protection against air pollutants.
- Provided climate change advice to state agencies, local governments and other stakeholders on climate change risk and vulnerability assessments and adaptation planning.
- Continued to participate in the development of a National Standard for Environmental Risk Management of Industrial Chemicals to create a nationally consistent approach for managing environmental risks posed by industrial chemicals.
- Commenced a review of the Environmental Protection (Controlled Waste) Regulations 2004 to streamline processes for the regulation of the transportation of controlled wastes. This review complements amendments that were undertaken in 2014 to provide greater clarity for industry.
Service 3: Waste strategies

The Environment Minister is responsible for ensuring the Waste Authority is provided with services to fulfil its functions. The Department’s staff provided this service, which included implementing programs and projects in the business plan 2016–17.

The Waste Authority has a role in administering the Waste Avoidance and Resource Recovery Account and the delivery of projects and programs in the Business Plan and related government priorities.

Increased waste compliance and enforcement ensures that illegal dumping and levy evasion are not seen as viable options in response to increased waste levy rates.

**Efficiency indicator**

| Cost of landfill levy compliance as a percentage of landfill levy income collected | 3% | 2.4% | 0.6% |

(1) As specified in the 2016–17 Budget Statements.
(2) Further explanations are contained in the key performance indicators sections of this Annual Report.

### Key deliverables

A schedule to increase waste levy rates that apply to putrescible and inert landfills came into effect from 1 January 2015. Increases in waste levy rates are scheduled until July 2018 to address one of the key drivers of waste disposal – low cost landfiling.

In addition to undertaking prescribed premises and landfill levy compliance inspections, compliance officers investigated the extent of stockpiling of inert waste at landfills and recycling premises. These investigations revealed that the majority of the inert waste diverted from inert landfill, following the levy increase, was received at licensed facilities and had been processed, or was awaiting processing.

The State Government continued to support an illegal dumping team and implemented programs to support local and state government agencies, charitable recyclers and other partners in addressing the issue of illegal dumping of waste. The program delivered tailored education, surveillance and enforcement initiatives aimed at reducing illegal dumping.

The State Government also continued its focus on better practice collection systems for municipal waste through the $20 million Better Bins Kerbside Collection Program, which supports the rollout of consistent bin infrastructure to households to assist in the recovery of valuable resources being lost to landfill. As of 30 June 2017, 10 local governments had become Better Bins participants, representing approximately 20 per cent of households in the Perth metropolitan region.

The $10 million Recycled Construction Products Program promotes the use of recycled construction and demolition waste in civil engineering projects such as building roads, car parks and drains. Significant financial savings and environmental benefits can be achieved by using recycled construction and demolition waste, and the program will help realise those benefits. The Department worked with the Waste Authority to address issues relating to product standards which have impacted the uptake of program funding.

Disclosures and legal compliance

► Auditor General’s opinion

As part of an audit in accordance with Australian Auditing Standards, I express professional judgment and maintain professional scepticism throughout the audit. I also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures appropriate to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for my opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the agency’s internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Reporting Officer.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

I communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that I identify during my audit.

Report on Controls

Opinion

I have undertaken a reasonable assurance engagement on the design and implementation of controls exercised by the Department of Environment Regulation. The controls exercised by the Department are those policies and procedures established by the Director General to ensure that the receipt, expenditure and investment of money, the acquisition and disposal of property, and the incurrence of liabilities have been in accordance with legislative provisions (the overall control objectives).

My opinion has been formed on the basis of the matters outlined in this report.

In my opinion, in all material respects, the controls exercised by the Department of Environment Regulation are sufficiently adequate to provide reasonable assurance that the receipt, expenditure and investment of money, the acquisition and disposal of property, and the incurrence of liabilities have been in accordance with legislative provisions during the year ended 30 June 2017.

The Director General’s Responsibilities

The Director General was responsible for designing, implementing and maintaining controls to ensure that the receipt, expenditure and investment of money, the acquisition and disposal of property, and the incurrence of liabilities are in accordance with the Financial Management Act 2006 and the Treasurer’s Instructions and other relevant written laws.

Auditor General’s Responsibilities

As required by the Auditor General Act 2006, my responsibility as an assurance practitioner is to express an opinion on the suitability of the design of the controls to achieve the overall control objectives and the implementation of the controls as designed. I conducted my engagement in accordance with Standard on Assurance Engagements ASAE 3150 Assurance Engagements on Controls issued by the Australian Auditing and Assurance Standards Board. That standard requires that I comply with relevant ethical requirements and plan and perform my procedures to obtain reasonable assurance (about whether, in all material respects, the controls are suitably designed to achieve the overall control objectives and the controls, necessary to achieve the overall control objectives, were implemented as designed).
An assurance engagement to report on the design and implementation of controls involves performing procedures to obtain evidence about the suitability of the design of controls to achieve the overall control objectives and the implementation of those controls. The procedures selected depend on my judgment, including the assessment of the risks that controls are not suitably designed or implemented as designed. My procedures included testing the implementation of those controls that I consider necessary to achieve the overall control objectives.

I believe that the evidence I have obtained is sufficient and appropriate to provide a basis for my opinion.

Limitations of Controls
Because of the inherent limitations of any internal control structure it is possible that, even if the controls are suitably designed and implemented as designed, once the controls are in operation, the overall control objectives may not be achieved so that fraud, error, or noncompliance with laws and regulations may occur and not be detected. Any projection of the outcome of the evaluation of the suitability of the design of controls to future periods is subject to the risk that the controls may become unavailable because of changes in conditions.

Report on the Key Performance Indicators

Basis for Qualified Opinion
The following effectiveness key performance indicators for outcome 1 “Emissions, discharges and clearing of native vegetation are effectively regulated to avoid unacceptable risks to public health and the environment” are not relevant as they do not adequately measure the extent to which the outcome was achieved:

Key Effectiveness Indicator 1.1 Percentage of major resource project works approvals and licences applications decided within 60 working days
Key Effectiveness Indicator 1.2 Percentage of other project works approvals and licences applications decided within 60 working days
Key Effectiveness Indicator 1.3 Percentage of native vegetation clearing permit applications decided within 60 working days
Key Effectiveness Indicator 1.4 Percentage of investigations finalised within 60 working days

Qualified Opinion
I have undertaken a reasonable assurance engagement on the key performance indicators of the Department of Environment Regulation for the year ended 30 June 2017. The key performance indicators for the Department of Environment Regulation are relevant and appropriately tested to allow users to assess the Department’s performance and fairly represent the quality of performance for the year ended 30 June 2017.

The Reporting Officer’s Responsibility for the Key Performance Indicators
The reporting officer is responsible for the preparation and fair presentation of the key performance indicators in accordance with the Financial Management Act 2006 and the Treasurer’s Instructions and for internal control as the Reporting Officer determines necessary to enable the preparation of key performance indicators that are free from material misstatement, whether due to fraud or error.

In preparing the key performance indicators, the Reporting Officer is responsible for identifying key performance indicators that are relevant and appropriate having regard to their purpose in accordance with the Treasurer’s Instruction 804 Key Performance Indicators.

Auditor General’s Responsibility
As required by the Auditor General Act 2006, my responsibility as an assurance practitioner is to express an opinion on the key performance indicators. The objectives of my engagement are to obtain reasonable assurance about whether the key performance indicators are relevant, appropriate and suitably designed to allow users to assess the agency’s performance and whether the key performance indicators are free from material misstatement, whether due to fraud or error, and to issue an auditor’s report that includes my opinion. I conducted my engagement in accordance with Standard on Assurance Engagements ASAE 3000 Assurance Engagements Other than Audits or Reviews of Historical Financial Information issued by the Australian Auditing and Assurance Standards Board. That standard requires that I comply with relevant ethical requirements relating to assurance engagements.

An assurance engagement involves performing procedures to obtain evidence about the amounts and disclosures in the key performance indicators. It also involves evaluating the relevance and appropriateness of the key performance indicators against the criteria and guidance in the Treasurer’s Instruction 804 for measuring the extent of outcome achievement and the efficiency of service delivery. The procedures selected depend on my judgment, including the assessment of the risks of material misstatement of the key performance indicators. In making those risk assessments, I obtain an understanding of internal control relevant to the engagement in order to design procedures that are appropriate in the circumstances.

I believe that the evidence I have obtained is sufficient and appropriate to provide a basis for my qualified opinion.

My Independence and Quality Control Relating to the Reports on Controls and Key Performance Indicators
I have complied with the independence requirements of the Auditor General Act 2006 and the relevant ethical requirements relating to assurance engagements. In accordance with ASQC 1 Quality Control for Firms that Perform Audits and Reviews of Financial Reports and Other Financial Information, and Other Assurance Engagements, the Office of the Auditor General maintains a comprehensive system of quality control including documented policies and procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

Matter Relating to the Electronic Publication of the Audited Financial Statements and Key Performance Indicators

This auditor’s report relates to the financial statements and key performance indicators of the Department of Environment Regulation for the year ended 30 June 2017 included in the Department’s website. The Department’s management is responsible for the integrity of the Department’s website. This audit does not provide assurance on the integrity of the Department’s website. The auditor’s report refers only to the financial statements and key performance indicators described above. It does not provide an opinion on any other information which may have been hyperlinked to from these financial statements or key performance indicators. If users of the financial statements and key performance indicators are concerned with this inherent risk arising from publication on a website, they are advised to refer to the hard copy of the audited financial statements and key performance indicators to confirm the information contained in this website version of the financial statements and key performance indicators.

DEPARTMENT OF ENVIRONMENT REGULATION

Disclosures and Legal Compliance

Financial Statements

Certification of Financial Statements

For the year ended 30 June 2017

The accompanying financial statements of the Department of Environment Regulation have been prepared in compliance with the provisions of the Financial Management Act 2006 from proper accounts and records to present fairly the financial transactions for the financial year ended 30 June 2017 and the financial position as at 30 June 2017.

At the date of signing I am not aware of any circumstances which would render any particulars included in the financial statements misleading or inaccurate.

Amanda Alderson
Reporting Officer
12 October 2017

The Schedule of Assets and Liabilities by Service should be read in conjunction with the accompanying notes.
### DEPARTMENT OF ENVIRONMENT REGULATION

#### NOTES TO THE FINANCIAL STATEMENTS

For the year ended 30 June 2017

1. **Australian Accounting Standards**
   - **General**
   - The Department’s financial statements for the year ended 30 June 2017 have been prepared in accordance with Australian Accounting Standards. The term ‘Australian Accounting Standards’ includes Standards and Interpretations issued by the Australian Accounting Standards Board (AASB).
   - The Department has adopted any applicable, new and revised Australian Accounting Standards from their operative dates.
   - **Early adoption of standards**
   - The Department cannot early adopt an Australian Accounting Standard unless specifically permitted by TI 1101 Application of Australian Accounting Standards and Other Pronouncements. There has been no early adoption of Australian Accounting Standards that have been issued or amended (but not operative) by the Department for the annual reporting period ended 30 June 2017.

2. **Summary of significant accounting policies**
   - **(a) General statement**
   - The Department is a not-for-profit reporting entity that prepares general purpose financial statements in accordance with Australian Accounting Standards, the Framework, Statements of Accounting Concepts and other authoritative pronouncements of the AASB as applied by the Treasurer’s Instructions. Several of these are modified by the Treasurer’s Instructions to vary application, disclosure, format and wording.
   - The Financial Management Act 2006 and the Treasurer’s Instructions impose legislative provisions that govern the preparation of financial statements and take precedence over Australian Accounting Standards, the Framework, Statements of Accounting Concepts and other authoritative pronouncements of the AASB.
   - Where modification is required and has had a material or significant financial effect upon the reported results, details of that modification and the resulting financial effect are disclosed in the notes to the financial statements.
   - **(b) Basis of preparation**
   - The financial statements have been prepared on the accrual basis of accounting using the historical cost convention, except for land which has been measured at fair value.
   - As disclosed in note 36 the Department of Environment Regulation, Department of Water and the Office of the Environmental Protection Agency amalgamated to form the Department of Water and Environmental Regulation. The financial statements have been prepared on a going concern basis as the net assets of the Department have been transferred to the new Department who will continue to provide services to the public.
   - The accounting policies adopted in the preparation of the financial statements have been consistently applied throughout all periods presented unless otherwise stated.
   - The financial statements are presented in Australian dollars and all values are rounded to the nearest thousand dollars ($000).
   - Note 3 ‘Judgments made by management in applying accounting policies’ discloses judgments that have been made in the process of applying the Department’s accounting policies resulting in the most significant effect on amounts recognised in the financial statements.
NOTES TO THE FINANCIAL STATEMENTS
For the year ended 30 June 2017

(c) Reporting entity

The reporting entity comprises the Department and related bodies included at note 40 ‘Related and affiliated bodies’.

Mission

To advise on and implement strategies for a healthy environment, for all Western Australians.

The Department is predominantly funded by fees received for the provision of services to the public and supplemented by Parliamentary appropriations. The financial statements encompass all funds through which the Department controls resources to carry on its functions.

Services

The Department adheres to the Outcome Based Management structure for 2016-17 which incorporates the following services:

Service 1: Environmental Regulation—by performing environmental regulation functions of approvals, compliance and enforcement.

Service 2: Environment Policy—by developing and implementing policies and strategies that promote sustainable environmental outcomes.

Service 3: Waste Strategies—by advising on and implementing the State Government’s strategies to reduce the environmental impact of waste.

The Department administers income and expenses on behalf of Government which are not controlled by, nor integral to the function of the Department. These administered transactions are not recognised in the principal financial statements of the Department but schedules are prepared using the same basis as the financial statements and are presented at note 44 ‘Disclosures of administered income and expenses by service’.

(d) Contributed equity

AASB Interpretation 1038 Contributions by Owners Made to Wholly-Owned Public Sector Entities requires transfers in the nature of equity contributions, other than as a result of a restructuring of administrative arrangements, to be designated by the Government (the owner) as contributions by owners (at the time of, or prior to transfer) before such transfers can be recognised as equity contributions. Capital appropriations have been designated as contributions by owners by TI 955 Contributions by Owners made to Wholly Owned Public Sector Entities and have been credited directly to Contributed Equity.

The transfers of net assets to/from other agencies, other than as a result of a restructuring of administrative arrangements, are designated as contributions by owners where the transfers are non-discretionary and non-reciprocal.

(e) Income

Revenue recognition

Revenue is recognised and measured at the fair value of consideration received or receivable. Revenue is recognised for the major business activities as follows:

For the year ended 30 June 2017

Provision of services

Revenue is recognised by reference to the stage of completion of the transaction.

Interest

Revenue is recognised as the interest accrues.

Service appropriations

Service Appropriations are recognised as revenues at fair value in the period in which the Department gains control of the appropriated funds. The Department gains control of appropriated funds at the time those funds are deposited to the bank account or credited to the ‘Amounts receivable for services’ (holding account) held at Treasury.

Net appropriation determination

The Treasurer may make a determination providing for prescribed receipts to be retained for services under the control of the Department. In accordance with the most recent determination as quantified in the 2016–17 Budget Statements, the Department retained $99.4 million ($96.1 million in 2016) from the following:

- proceeds from user charges and fees
- Commonwealth specific purpose grants and contributions
- interest revenue
- landfill levy
- other revenue.

Grants, donations, gifts and other non-reciprocal contributions

Revenue is recognised at fair value when the Department obtains control over the assets comprising the contributions, usually when cash is received.

Other non-reciprocal contributions that are not contributions by owners are recognised at their fair value. Contributions of services are only recognised when a fair value can be reliably determined and the services would be purchased if not donated.

Royalties for Regions funds are recognised as revenue at fair value in the period in which the Department gains control over the funds. The Department gains control of the funds at the time the funds are deposited into the Department’s bank account.

Gains

Realised or unrealised gains are usually recognised on a net basis. These include gains arising on the disposal of non-current assets and some revaluations of non-current assets.

(f) Property, plant and equipment

Capitalisation/expensing of assets

Items of property, plant and equipment costing $5,000 or more are recognised as assets and the cost of utilising assets is expensed (depreciated) over their useful lives. Items of property, plant and equipment costing less than $5,000 are immediately expensed direct to the Statement of Comprehensive Income (other than where they form part of a group of similar items which are significant in total).
NOTES TO THE FINANCIAL STATEMENTS
For the year ended 30 June 2017

Initial recognition and measurement

Property, plant and equipment are initially recognised at cost.

For items of property, plant and equipment acquired at no cost or for nominal cost, the cost is their fair value at the date of acquisition.

Subsequent measurement

Subsequent to initial recognition as an asset, the revaluation model is used for the measurement of land and historical cost for all other property, plant and equipment. Land is carried at fair value less accumulated impairment losses. All other items of property, plant and equipment are stated at historical cost less accumulated depreciation and accumulated impairment losses.

Where market-based evidence is available, the fair value of land is determined on the basis of current market buying values determined by reference to recent market transactions.

In the absence of market-based evidence, fair value of land is determined on the basis of existing use. This normally applies where land use is restricted. Fair value for restricted use land is determined by comparison with market evidence for land with similar approximate utility (high restricted land use) or market value of comparable unrestricted land (low restricted land use).

Land is independently valued annually by the Western Australian Land Information Authority (Valuation Services) and recognised annually to ensure that the carrying amount does not differ materially from the asset’s fair value at the end of the reporting period.

The most significant assumptions and judgements in estimating fair value are made in assessing whether to apply the existing use basis to assets and in determining estimated useful economic life. Professional judgment by the valuer is required where the evidence does not provide a clear distinction between market type assets and existing use assets.

Derecognition

Upon disposal or derecognition of an item of property, plant and equipment, any revaluation surplus relating to that asset is retained in the asset revaluation surplus.

Asset revaluation surplus

The asset revaluation surplus is used to record increments and decrements on the revaluation of non-current assets on a class of assets basis.

Depreciation

All non-current assets having a limited useful life are systematically depreciated over their estimated useful lives in a manner that reflects the consumption of their future economic benefits.

Depreciation is calculated using the straight-line method, using rates which are reviewed annually. Estimated useful lives for each class of depreciable asset are:

- Information technology assets: 3 to 6 years
- Environmental assets: 2 to 10 years
- Office equipment: 2 to 10 years
- Software (a): 2 ½ years
- Plant and equipment: 3 to 20 years

(a) Software that is integral to the operation of related hardware.

Land is not depreciated.

(g) Intangible assets

Capitalisation/expensing of assets

Acquisitions of intangible assets costing $5,000 or more and internally generated intangible assets costing $50,000 or more are capitalised. The cost of utilising the assets is expensed (amortised) over their useful lives. Costs incurred below these thresholds are immediately expensed directly to the Statement of Comprehensive Income.

Intangible assets are initially recognised at cost. For assets acquired at no cost or for nominal cost, the cost is their fair value at the date of acquisition.

The cost model is applied for subsequent measurement requiring the asset to be carried at cost less any accumulated amortisation and accumulated impairment losses.

Amortisation for intangible assets with finite useful lives is calculated for the period of the expected benefit (estimated useful life which is reviewed annually) on the straight-line basis. All intangible assets controlled by the Department have a finite useful life and zero residual value.

The expected useful lives for each class of intangible asset are:

- Development costs: 2 ½ to 5 years
- Computer software (a): 2 ½ to 5 years
- Website costs: 2 ½ to 5 years

(a) Software that is not integral to the operation of any related hardware.

Development costs

Research costs are expensed as incurred. Development costs incurred for an individual project are carried forward when the future economic benefits can reasonably be regarded as assured and the total project costs are likely to exceed $50,000. Other development costs are expensed as incurred.

Computer software

Software that is an integral part of the related hardware is recognised as property, plant and equipment. Software that is not an integral part of the related hardware is recognised as an intangible asset. Software costing less than $5,000 is expensed in the year of acquisition.

Website costs

Website costs are charged as expenses when they are incurred unless they relate to the acquisition or development of an asset when they may be capitalised and amortised. Generally, costs in relation to feasibility studies during the planning phase of a website, and ongoing costs of maintenance during the operating phase are expensed. Costs incurred in building or enhancing a website that can be reliably measured, are capitalised to the extent that they represent probable future economic benefits.

(h) Impairment of assets

Property plant and equipment and intangible assets are tested for any indication of impairment at the end of each reporting period. Where there is an indication of impairment, the recoverable amount is estimated. Where the recoverable amount is less than the carrying amount, the
NOTES TO THE FINANCIAL STATEMENTS
For the year ended 30 June 2017

asset is considered impaired and is written down to the recoverable amount and an impairment loss is recognised. Where an asset measured at cost is written down to recoverable amount, an impairment loss is recognised in profit or loss. Where a previously revalued asset is written down to recoverable amount, the loss is recognised as a revaluation decrement in other comprehensive income. As the Department is a not-for-profit entity, unless an asset has been identified as a surplus asset, the recoverable amount is the higher of an asset’s fair value less costs to sell and depreciated replacement cost.

The risk of impairment is generally limited to circumstances where an asset’s depreciation is materially understated, where the replacement cost is falling or where there is a significant change in useful life. Each relevant class of assets is reviewed annually to verify that the accumulated depreciation reflects the level of consumption or expiration of the asset’s future economic benefits and to evaluate any impairment risk from falling replacement costs.

The recoverable amount of assets identified as surplus assets is the higher of fair value less costs to sell and the present value of future cash flows expected to be derived from the asset. Surplus assets carried at fair value have no risk of material impairment where fair value is determined by reference to market-based evidence. Where fair value is determined by reference to depreciated replacement cost, surplus assets are at risk of impairment and the recoverable amount is measured. Surplus assets at cost are tested for indications of impairment at the end of each reporting period.

(i) Non-current assets (or disposal groups) classified as held for sale

Non-current assets (or disposal groups) held for sale are recognised at the lower of carrying amount or fair value less costs to sell, and are disclosed separately from other assets in the Statement of Financial Position. Assets classified as held for sale are not depreciated or amortised.

All Crown land holdings are vested in the Department by Government. The Department of Lands (DoL) is the only agency with the power to sell Crown land. The Department transfers the Crown land and any attached buildings to DoL when the land becomes available for sale.

(j) Leases

The Department holds operating leases for buildings, office equipment and motor vehicles. Lease payments are expensed on a straight line basis over the lease term as this represents the pattern of benefits derived from the leased assets.

(k) Financial instruments

In addition to cash, the Department has two categories of financial instrument:

- loans and receivables; and
- financial liabilities measured at amortised cost.

Financial instruments have been disaggregated into the following classes:

- Financial Assets
  - cash and cash equivalents
  - restricted cash and cash equivalents
  - receivables
  - amounts receivable for services

- Financial Liabilities
  - payables
NOTES TO THE FINANCIAL STATEMENTS
For the year ended 30 June 2017

Provisions – employee benefits
All annual leave and long service leave provisions are in respect of employees’ services up to the end of the reporting period.

Annual leave
Annual leave is not expected to be settled wholly within 12 months after the end of the reporting period and is therefore considered to be ‘other long-term employee benefits’. The annual leave liability is recognised and measured at the present value of amounts expected to be paid when the liabilities are settled using the remuneration rate expected to apply at the time of settlement. When assessing expected future payments consideration is given to expected future wage and salary levels including non-salary components such as employer superannuation contributions, as well as the experience of employee departures and periods of service. The expected future payments are discounted using market yields at the end of the reporting period on national government bonds with terms to maturity that match, as closely as possible, the estimated future cash outflows. The provision for annual leave is classified as a current liability as the Department does not have an unconditional right to defer settlement of the liability for at least 12 months after the end of the reporting period.

Long service leave
Long service leave is not expected to be settled wholly within 12 months after the end of the reporting period and is therefore recognised and measured at the present value of amounts expected to be paid when the liabilities are settled using the remuneration rate expected to apply at the time of settlement. When assessing expected future payments consideration is given to expected future wage and salary levels including non-salary components such as employer superannuation contributions, as well as the experience of employee departures and periods of service. The expected future payments are discounted using market yields at the end of the reporting period on national government bonds with terms to maturity that match, as closely as possible, the estimated future cash outflows. Unconditional long service leave provisions are classified as current liabilities as the Department does not have an unconditional right to defer settlement of the liability for at least 12 months after the end of the reporting period. Pre-conditional and conditional long service leave provisions are classified as non-current liabilities because the Department has an unconditional right to defer settlement of the liability until the employee has completed the requisite years of service.

Superannuation
The Government Employees Superannuation Board (GESB) and other fund providers administer public sector superannuation arrangements in Western Australia in accordance with legislative requirements. Eligibility criteria for membership in particular schemes for public sector employees vary according to commencement and implementation dates. Eligible employees contribute to the Pension Scheme, a defined benefit pension scheme closed to new members since 1987, or the Gold State Superannuation Scheme (GSS), a defined benefit lump sum scheme closed to new members since 1995. Employees commencing employment prior to 16 April 2007 who were not members of either the Pension Scheme or the GSS became non-contributory members of the West State Superannuation Scheme (WSS). Employees commencing employment on or after 16 April 2007 became members of the GESB Super Scheme (GESBS). From 30 March 2012, existing members of the WSS or GESBS and new employees became able to choose their preferred superannuation fund provider. The Department makes contributions to GESB or other funds on behalf of employees in compliance with the Commonwealth Government’s Superannuation Guarantee (Administration) Act 1992. Contributions to these accumulation schemes extinguish the Department’s liability for superannuation charges in respect of employees who are not members of the Pension Scheme or GSS.

The GSS is a defined benefit scheme for the purposes of employees and whole-of-government reporting. However, it is a defined contribution plan for agency purposes because the concurrent contributions (defined contributions) made by the Department to GESB extinguishes the agency’s obligations to the related superannuation liability. The Department has no liabilities under the Pension Scheme or the GSS. The liabilities for the unfunded Pension Scheme and the unfunded GSS transfer benefits attributable to members who transferred from the Pension Scheme, are assumed by the Treasurer. All other GSS obligations are funded by concurrent contributions made by the Department to GESB. GESB makes all benefit payments in respect of the Pension Scheme and GSS, and is recouped from the Treasurer for the employer’s share.

Provisions – other
Employment on-costs
Employment on-costs, including workers’ compensation insurance, are not employee benefits and are recognised separately as liabilities and expenses when the employment to which they relate has occurred. Employment on-costs are included as part of ‘Other expenses’ and are not included as part of the Department’s ‘Employee benefits expense’. The related liability is included in ‘Employment on-costs provision’.

(r) Superannuation expense
The superannuation expense is recognised in the profit or loss of the Statement of Comprehensive Income and comprises employer contributions paid to the GSS (concurrent contributions), the WSS, the GESBS, or other superannuation funds. The employer contribution paid to GESB in respect of the GSS is paid back into the Consolidated Account by GESB.

(s) Assets and services received free of charge or for nominal cost
Assets or services received free of charge or for nominal cost that the Department would otherwise purchase if not donated, are recognised as income at the fair value of the assets or services where they can be reliably measured. A corresponding expense is recognised for services received. Receipts of assets are recognised in the Statement of Financial Position. Assets or services received from other State Government agencies are separately disclosed under Income from State Government in the Statement of Comprehensive Income.

(1) Comparative figures
Comparative figures are, where appropriate, reclassified to be comparable with the figures presented in the current financial year.

3. Judgments made by management in applying accounting policies
The preparation of financial statements requires management to make judgments about the application of accounting policies that have a significant effect on the amounts recognised in the financial statements. The Department evaluates these judgments regularly.
NOTES TO THE FINANCIAL STATEMENTS

For the year ended 30 June 2017

17

Operating lease commitments

The Department has entered into a number of leases for buildings for branch office accommodation. Some of these leases relate to buildings of a temporary nature and it has been determined that the lessor retains substantially all the risks and rewards incidental to ownership. Accordingly, these leases have been classified as operating leases.

4. Key sources of estimation uncertainty

Key estimates and assumptions concerning the future are based on historical experience and various other factors that have a significant risk of causing a material adjustment to the carrying amount of assets and liabilities within the next reporting period.

Long Service Leave

Several estimations and assumptions used in calculating the Department’s long service leave provision include expected future salary rates, discount rates, employee retention rates and expected future payments. Changes in these estimations and assumptions may impact on the carrying amount of the long service leave provision.

5. Disclosure of changes in accounting policy and estimates

Initial application of an Australian Accounting Standard

The Department has applied the following Australian Accounting Standards effective, or adopted, for annual reporting periods beginning on or after 1 July 2016 that impacted on the Department.

AASB 1057 Application of Australian Accounting Standards

This Standard lists the application paragraphs for each other Standard (and Interpretation), grouped where they are the same. There is no financial impact.

AASB 2014-3 Amendments to Australian Accounting Standards – Accounting for Acquisitions of Interests in Joint Operations [AASB 1 & 11]

The Department establishes Joint Operations in pursuit of its objectives and does not routinely acquire interests in Joint Operations. Therefore, there is no financial impact on application of the Standard.

AASB 2014-4 Amendments to Australian Accounting Standards – Clarification of Acceptable Methods of Depreciation and Amortisation [AASB 116 & 138]

The adoption of this Standard has no financial impact for the Department as depreciation and amortisation is not determined by reference to revenue generation, but by reference to consumption of future economic benefits.
Disclosures and legal compliance

For the year ended 30 June 2017

NOTES TO THE FINANCIAL STATEMENTS

Future impact of Australian Accounting Standards not yet operative

The Department cannot early adopt an Australian Accounting Standard unless specifically permitted by TI 1101 Application of Australian Accounting Standards and Other Pronouncements or by an exemption from TI 1101. By virtue of a limited exemption, the Department has early adopted AASB 2015-7 Amendments to Australian Accounting Standards - Fair Value Disclosures of Not-for-Profit Public Sector Entities. Where applicable, the Department plans to apply the following Australian Accounting Standards from their application date.

AASB 9
Financial Instruments
This Standard supersedes AASB 139 Financial Instruments: Recognition and Measurement, introducing a number of changes to accounting treatments.

The mandatory application date of this Standard is currently 1 January 2018 after being amended by AASB 2012-6, AASB 2013-9 and AASB 2014-1 Amendments to Australian Accounting Standards. The Department has not yet determined the application or the potential impact of the Standard.

AASB 15
Revenue from Contracts with Customers
This Standard establishes the principles that the Department shall apply to report useful information to users of financial statements about the nature, amount, timing and uncertainty of revenue and cash flows arising from a contract with a customer. The Department's income is principally derived from appropriations which will be measured under AASB 1058 Income of Not for Profit Entities and will be unaffected by this change.

However, the Department has not yet determined the potential impact of the Standard on ‘User charges and fees’ and ‘Sales’ revenues. In broad terms, it is anticipated that the terms and conditions attached to these revenues will defer revenue recognition until the Department has discharged its performance obligations.

AASB 16
Leases
This Standard introduces a single lessee accounting model and requires a lessee to recognise assets and liabilities for all leases with a term of more than 12 months, unless the underlying asset is of low value.

Whilst the impact of AASB 16 has not yet been quantified, the entity currently has operating lease commitments for $7,500,000. The Department anticipates most of this amount will be brought onto the statement of financial position, excepting amounts pertinent to short term or low value leases. Interest and amortisation expense will increase and rental expense will decrease.

Operative for reporting periods beginning on/after 1 Jan 2019

AASB 1058
Income of Not-for-Profit Entities
This Standard clarifies and simplifies the income recognition requirements that apply to not for profit (NFP) entities, more closely reflecting the economic reality of NFP entity transactions that are not contracts with customers. Timing of income recognition is dependent on whether such a transaction gives rise to a liability, a performance obligation (a promise to transfer a good or service), or, an obligation to acquire an asset. The Department has not yet determined the application or the potential impact of the Standard.

AASB 2010-7
Amendments to Australian Accounting Standards arising from AASB 9 (December 2010) [AASB 1, 3, 4, 5, 7, 101, 102, 106, 112, 118, 120, 121, 127, 128, 131, 132, 136, 137, 139, 1023 & 1038 and IAS 2, 5, 10, 12, 19 & 127]
This Standard makes consequential amendments to other Australian Accounting Standards and Interpretations as a result of issuing AASB 9 in December 2010.

The mandatory application date of this Standard has been amended by AASB 2012-6 and AASB 2014-1 to 1 January 2018. The Department has not yet determined the application or the potential impact of the Standard.

AASB 2014-1
Amendments to Australian Accounting Standards
Part E of this Standard makes amendments to AASB 9 and consequential amendments to other Standards. It has not yet been assessed by the Authority to determine the application or potential impact of the Standard.

AASB 2014-5
Amendments to Australian Accounting Standards arising from AASB 15
This Standard gives effect to the consequential amendments to Australian Accounting Standards (including Interpretations) arising from the issuance of AASB 15. The mandatory application date of this Standard has been amended by AASB 2015-8 to 1 January 2018. The Department has not yet determined the application or the potential impact of the Standard.
Disclosures and legal compliance

DEPARTMENT OF ENVIRONMENT REGULATION

NOTES TO THE FINANCIAL STATEMENTS
For the year ended 30 June 2017

Operative for reporting periods beginning on/after

AASB 2014-7 Amendments to Australian Accounting Standards arising from AASB 9 (December 2014)
This Standard gives effect to the consequential amendments to Australian Accounting Standards (including Interpretations) arising from the issuance of AASB 9 (December 2014). The Department has not yet determined the application or the potential impact of the Standard.
1 Jan 2018

AASB 2014-10 Amendments to Australian Accounting Standards – Sale or Contribution of Assets between an Investor and its Associate or Joint Venture [AASB 10 & 128]
This Standard amends AASB 10 and AASB 128 to address an inconsistency between the requirements in AASB 10 and those in AASB 128 (August 2011), in dealing with the sale or contribution of assets between an investor and its associate or joint venture. The mandatory effective date (application date) for the Standard has been deferred to 1 Jan 2018 by AASB 2015 10. The Department has determined that the Standard has no financial impact.
1 Jan 2018

AASB 2015-8 Amendments to Australian Accounting Standards – Effective Date of AASB 15
This Standard amends the mandatory effective date (application date) of AASB 15 Revenue from Contracts with Customers so that AASB 15 is required to be applied for annual reporting periods beginning on or after 1 January 2018 instead of 1 January 2017. For Not For Profit entities, the mandatory effective date has subsequently been amended to 1 January 2019 by AASB 2016 7. The Department has not yet determined the application or the potential impact of AASB 15.
1 Jan 2019

AASB 2016-2 Amendments to Australian Accounting Standards – Disclosure Initiative: Amendments to AASB 107
This Standard amends AASB 107 Statement of Cash Flows (August 2015) to require disclosures that enable users of financial statements to evaluate changes in liabilities arising from financing activities, including both changes arising from cash flows and non-cash changes. There is no financial impact.
1 Jan 2017

AASB 2016-3 Amendments to Australian Accounting Standards – Clarifications to AASB 15
This Standard clarifies identifying performance obligations, principal versus agent considerations, timing of recognising revenue from granting a licence, and, provides further transitional provisions to AASB 15. The Department has not yet determined the application or the potential impact.
1 Jan 2018

AASB 2016-4 Amendments to Australian Accounting Standards – Recoverable Amount of Non-Cash-Generating Specialised Assets of Not-for-Profit Entities
This Standard clarifies that the recoverable amount of primarily non-cash-generating assets of not-for-profit entities, which are typically specialised in nature and held for continuing use of their service capacity, is expected to be materially the same as fair value determined under AASB 13 Fair Value Measurement. The Department has not yet determined the application or the potential impact.
1 Jan 2017

AASB 2016-7 Amendments to Australian Accounting Standards – Deferral of AASB 15 for Not for Profit Entities
This Standard inserts Australian requirements and authoritative implementation guidance for not-for-profit entities into AASB 9 and AASB 15. This guidance assists not-for-profit entities in applying those Standards to particular transactions and other events. There is no financial impact.
1 Jan 2017

AASB 2016-8 Amendments to Australian Accounting Standards – Australian Implementation Guidance for Not for Profit Entities
This Standard amend the mandatory effective date (application date) of AASB 15 and defers the consequential amendments that were originally set out in AASB 2014 5 Amendments to Australian Accounting Standards arising from AASB 15 for not for profit entities to annual reporting periods beginning on or after 1 January 2019, instead of 1 January 2018. There is no financial impact.
1 Jan 2019

AASB 2017-2 Amendments to Australian Accounting Standards – Further Annual Improvements 2014 2016 Cycle
This Standard clarifies the scope of AASB 12 by specifying that the disclosure requirements apply to an entity’s interests in other entities that are classified as held for sale, held for distribution to owners in their capacity as owners or discontinued operations in accordance with AASB 5. There is no financial impact.

</table>

(a) Includes the value of the fringe benefit to the employee plus the fringe benefits tax component, less entitlements including superannuation contribution component.

(b) A prior year amount has been restated to include a reclassification of $4,778 million relating to employee benefits from 'Grants and Subsidies' and 'Revaluation decrements on impairment of land' as classified under Note 11 in 'Grants and Subsidies'.

(4) Defined contribution plans include West State Superannuation Scheme (WSS), Gold State Superannuation Scheme (GSS), Government Employees Superannuation Board (GESB) and other eligible funds.

#### COMPENSATION OF KEY MANAGEMENT PERSONNEL

The Department has determined that key management personnel include Ministers and senior officers of the Department. However, the Department is not obligated to compensate Ministers and therefore disclosures in relation to Ministers' compensation may be found in the Annual Report on State Finances.

Total compensation for senior officers of the Department for the reporting period is presented within the following bands:

- **Remuneration Band ($)**
  - 60,001 - 70,000
  - 70,001 - 80,000
  - 110,001 - 120,000
  - 150,001 - 160,000
  - 160,001 - 170,000
  - 180,001 - 190,000
  - 210,001 - 220,000
  - 230,001 - 240,000
  - 290,001 - 300,000
  - 330,001 - 340,000

- **Total depreciation and amortisation**

#### 8 SUPPLIES AND SERVICES

- Consultations and contracts: 7,500 7,400
- Travel: 347 354
- Materials: 434 437
- Communications: 243 269
- Other: 1,089 1,139

Reclassification of payroll tax amounting to $267 million in 2016 from 'Supplies and Services' to 'Other Expenses' for better presentation.

#### 9 DEPRECIATION AND AMORTISATION EXPENSE

- Environmental technology assets: 9 9
- Environmental assets: 241 276
- Office equipment: 3 3
- Plant and equipment: 226 216

Total depreciation: 289 294

Amortisation:

- Computer hardware: 684 684
- Software: 413 413

Total depreciation and amortisation: 330 337

#### 10 OTHER EXPENSES

- Vehicle and other leases: 596 607
- Audit fees: 67 96
- Employment on-costs: 68 106
- Payroll Tax: 2,082 2,057
- Restoration costs - Brookdale Liquid Waste Treatment Facility Contaminated Site: 726 748
- Other: 2 2

Reclassification of payroll tax from Note 9 'Supplies and Services' to 'Other Expenses' for better presentation.

#### 13 RELATED PARTY TRANSACTIONS

The Department is a wholly owned and controlled entity of the State of Western Australia. In conducting its activities, the Department is required to pay various taxes and levies based on the standard terms and conditions that apply to all and any persons to the State and entities related to the State.

Related parties of the Department include:

- all Ministers and their close family members, and their controlled or jointly controlled entities;
- all senior officers and their close family members, and their controlled or jointly controlled entities;
- other departments and public sector entities, including related bodies included in the whole of government consolidated financial statements;
- associates and joint ventures, that are included in the whole of government consolidated financial statements; and
- the Government Employees Superannuation Board (GESB) and Gold State Superannuation Scheme (GSS).

Department of Environment Regulation final report 2016–17
NOTES TO THE FINANCIAL STATEMENTS

For the year ended 30 June 2017

Significant transactions with government related entities

Significant transactions include:

- service appropriations (Note 19);
- capital appropriations (Note 11);
- services received free of charge (Note 19);
- royalties for regions fund (Note 19);
- superannuation payments to GESB $2.97 million and GSS $0.27 million (Note 6);
- lease rental payments to the Department of Finance $4.60 million (Note 10); and
- grants and subsidies provided by Keep Australia Beautiful WA $0.06 million and Lanscape $0.02 million (Note 11), and
- remuneration for services provided by the Auditor General (Note 39).

- supplies and services (Note 8)
  - Department of The Attorney General $0.25 million
  - Department of Corrective Services $0.07 million
  - Keep Australia Beautiful (WA) $0.06 million
  - Department of Parks & Wildlife $2.56 million
  - Department of Finance $0.43 million
  - Department of Housing $0.14 million
  - Office of The Environmental Protection Authority $0.14 million
  - Riskcover $0.08 million
  - Landgate $0.02 million

- other expenses (Note 12)
  - Riskcover $0.07 million
  - State Fleet WA $0.33 million

- other revenue (Note 17)
  - Main Roads WA $1.77 million
  - Water Corporation $0.17 million
  - Western Australian Planning Commission $0.08 million
  - Department of Parks & Wildlife $0.14 million
  - Office of The Environmental Protection Authority $0.14 million
  - Department of Fire & Emergency Services $0.05 million

Significant outstanding commitments with government related entities

Significant transactions include:

- commitments (Note 34)
  - State Fleet WA $0.33 million
  - Department of Finance $0.43 million

Material transactions with related parties

The Department had no material related party transaction with Ministers/senior officers or their close family members or their controlled or party controlled entities for disclosure.

NOTES TO THE FINANCIAL STATEMENTS

For the year ended 30 June 2017

DEPARTMENT OF ENVIRONMENT REGULATION

14 USER CHARGES AND FEES

Industry licences 19,821 17,792
Controlled waste 4,245 4,071
Clearing permits 63 57
Other charges and fees 185 246
Total 24,314 22,166

15 COMMONWEALTH GRANTS AND CONTRIBUTIONS

National Pollution Inventory $63 $63

16 LANDFILL LEVY

Landfill levy 68,423 68,946

The WARR Account was established in 2008 under section 79 of the Waste Avoidance and Resource Recovery Act 2007 (WARR Act). The WARR Account holds revenue allocated from the levy to fund programs and waste management.

17 OTHER REVENUE

Environmental offset revenue 3,335 3,014
Other State and private grants and cost recoupments 1,631 2,283
Total 4,966 5,297

18 NET GAIN/(LOSS) ON DISPOSAL OF NON-CURRENT ASSETS

(d) Land was revalued as at 1 July 2016 by the Western Australian Land Information Authority (Valuations Section). The valuations were performed during the year ended 30 June 2017 and recognised at 30 June 2017. In undertaking the revaluation, fair value was determined by reference to market value for land $1,340,000 (2016: $1,490,000). For the remaining balance of $2,000, fair value of land was determined on the basis of comparisons with market evidence for land with low level utility (high restricted use land).
NOTES TO THE FINANCIAL STATEMENTS

Information on fair value measurements is provided in Note 25.
NOTES TO THE FINANCIAL STATEMENTS
For the year ended 30 June 2017

25 FAIR VALUE MEASUREMENTS

Assets measured at fair value:
2017

<table>
<thead>
<tr>
<th>Fair Value at end of period</th>
<th>Level 1 $000</th>
<th>Level 2 $000</th>
<th>Level 3 $000</th>
</tr>
</thead>
<tbody>
<tr>
<td>Land (Note 24)</td>
<td>1,340</td>
<td></td>
<td>1,342</td>
</tr>
<tr>
<td></td>
<td>-</td>
<td>1,340</td>
<td></td>
</tr>
</tbody>
</table>

2016

<table>
<thead>
<tr>
<th>Fair Value at end of period</th>
<th>Level 1 $000</th>
<th>Level 2 $000</th>
<th>Level 3 $000</th>
</tr>
</thead>
<tbody>
<tr>

<td>1,490</td>
<td></td>
<td>1,490</td>
</tr>
<tr>
<td></td>
<td>-</td>
<td>1,490</td>
<td></td>
</tr>
</tbody>
</table>

There were no transfers between Levels 1, 2 or 3 during the current and previous periods.

Valuation techniques to derive Level 2 fair values
Level 2 fair values of Land are derived using the market approach. Market evidence of sales prices of comparable land in close proximity is used to determine price per square metre.

Fair value measurements using significant unobservable inputs (Level 3)
2017

<table>
<thead>
<tr>
<th>Land $000</th>
</tr>
</thead>
<tbody>
<tr>
<td>-</td>
</tr>
</tbody>
</table>

2016

<table>
<thead>
<tr>
<th>Land $000</th>
</tr>
</thead>
<tbody>
<tr>
<td>-</td>
</tr>
</tbody>
</table>

There were no changes in valuation techniques during the period.

Valuation processes
There were no changes in valuation techniques during the period.

Transfers in and out of a fair value level are recognised on the date of the event or change in circumstances that caused the transfer. Transfers are generally limited to assets newly classified as non-current assets held for sale as Treasurer’s instructions require valuations of land, buildings and infrastructure to be categorised within Level 3 where the valuations will utilise significant Level 3 inputs on a recurring basis.

Land (Level 3 fair values)
Fair value for restricted use land is based on comparison with market evidence for land with low level utility (high restricted use land). The relevant comparators of land with low level utility is selected by the Western Australian Land Information Authority (Valuation Services) and represents the application of a significant Level 3 input in this valuation methodology. The fair value measurement is sensitive to values of comparable land, with higher values of comparable land correlating with higher estimated fair values of land.

</table>

(a) Annual leave liabilities have been classified as current as there is no unconditional right to defer settlement for at least 12 months after the end of the reporting period. Assessments indicate that actual settlement of the liabilities is expected to occur as follows:

- Within 12 months of the end of the reporting period: 1,688 1,479
- More than 12 months after the end of the reporting period: 383 438

(b) Long service leave liabilities have been classified as current where there is no unconditional right to defer settlement for at least 12 months after the end of the reporting period. Assessments indicate that actual settlement of the liabilities is expected to occur as follows:

- Within 12 months of the end of the reporting period: 1,882 1,855
- More than 12 months after the end of the reporting period: 621 687

(c) Deferred salary scheme liabilities have been classified as current where there is no unconditional right to defer settlement for at least 12 months after the end of the reporting period. Actual settlement of the liabilities is expected to occur as follows:

- Within 12 months of the end of the reporting period: 122 65
- More than 12 months after the end of the reporting period: 122 29

The associated expense, apart from the unwind of discount (finance cost) is disclosed in note 12 'Other expenses'.

#### Movements in other provisions

Movements in each class of provisions during the period, other than employee benefits, are set out below.

<table>
<thead>
<tr>
<th>Employment on-cost provisions</th>

</tr>
</tbody>
</table>

#### 31 EQUITY

The Western Australian Government holds the equity interest in the Department on behalf of the community. Equity represents the residual interest in the net assets of the Department. The asset revaluation surplus represents that portion of equity resulting from the revaluation of non-current assets.

<table>
<thead>
<tr>

<td>59,141</td>
</tr>
<tr>
<td></td>
<td>61,148</td>
<td>51,344</td>
</tr>
</tbody>
</table>

Reconciliation of net income to net cash flows provided by operating activities

Net income | 36,810 | 31,775 |
Non-cash items:
Depreciation and amortisation expense (note 9) | 1,140 | 1,241 |
Services received free of charge (note 19) | 820 | 888 |
Net revaluation decrement expensed off | 150 | 60 |
Assets not previously recognised | 2 | 1 |
Net proceeds on disposal of non-current assets | 44 | - |
Net gain on disposal of non-current assets | (25) | - |
Increase/decrease in assets:
Current receivables | 281 | 708 |
Other current assets | 50 | 6 |
Increase/decrease in liabilities:
Current payables | (544) | (1,102) |
Current provisions | 633 | 1,651 |
Non-current provisions | 126 | (710) |
Net GST payments (b) | 100 | 165 |
Change in GST in receivables/payables (c) | (122) | (38) |
Net cash provided by operating activities | 39,274 | 34,634 |

(a) Note that the Australian Taxation office (ATO) receivable/payable in respect of GST and the receivable/payable in respect of the sale/purchase of non-current assets are not included in these items as they do not form part of the reconciling items.
(b) This is the net GST paid/received, i.e. Cash transactions.
(c) This reverses out the GST in receivables and payables.

NOTES TO THE STATEMENTS

33 SERVICES PROVIDED FREE OF CHARGE
During the period the following services were provided to other agencies free of charge for functions outside the normal operations of the Department:

Keep Australia Beautiful Council (KABC) - accommodation and administrative support services | 251 |

34 COMMITMENTS

Non-cancellable operating lease commitments

Committments for minimum lease payments are payable as follows:

- Within 1 year: 3,696
- Later than 1 year and not later than 5 years: 3,614
- Later than 5 years: 7,905

The Department has entered into four property leases which are non-cancellable and rents are payable monthly in advance. The leases have terms ranging from within one to five years; some with options to renew at the end of the lease. The Department’s accommodation lease account for $8,613k of the non-cancellable operating lease commitments for 2017. Contingent rent provisions within a lease agreement require that the minimum lease payments shall be increased by the lower of CPI or 3% per annum.

The Department’s fleet leases account for $525k of the non-cancellable operating lease commitments for 2017. The lease term varies depending on the vehicle. The lease payments are fixed for the term of the lease and are payable monthly. There is no option to renew the lease at the end of the lease term. The Department leases its motor vehicle fleet and certain office premises. The lease expenditure is expensed as it is incurred. Motor vehicle leasing arrangements are under the terms of the State Fleet Funding Facility Contract administered by State Fleet - State Supply Commission.

The Department’s printer leases account for $163k of the non-cancellable operating lease commitments for 2017. The lease term is 2 years. The lease payments are variable for the term of the lease based on an agreed volume of copies and are payable monthly. There are two optional 1 year contract extensions to the lease exercisable at the discretion of the Department at the end of the lease term. The lease-expenditure is expensed as it is incurred.

The commitments are inclusive of GST.
NOTES TO THE FINANCIAL STATEMENTS

For the year ended 30 June 2017

35 CONTINGENT LIABILITIES AND CONTINGENT ASSETS

Contingent liabilities

The following contingent liabilities are additional to the liabilities included in the financial statements:

Decommissioning and remediation of the Brookvale Liquid Waste Treatment Facility Contaminated Site - $7.9 million. Potential liability contingent upon the future intended use of the site. A signed letter of agreement dated 22 June 2017 between Water Corporation and Department of Environment Regulation (DER) agreed in principle to a transfer of land to DER.

Costs potentially payable in relation to Supreme Court action involving Fobbing Hall Pty Ltd - $0.1 million.

Contingent assets

The following contingent assets are additional to the assets included in the financial statements:

Benefit potentially receivable from the State’s claim for outstanding landfill levies involving Moltoni Corporation Pty Ltd (amount is plus costs and penalties) - $1.2 million.

Benefit potentially receivable in relation to Court of Appeal action involving Eclipse Resources Pty Ltd - $0.07 million.

Benefit potentially receivable in relation to application of special leave action involving Eclipse Resources Pty Ltd - $0.07 million.

Benefit potentially receivable in relation to application of Supreme Court action involving Fobbing Hall Pty Ltd (in Insolvency). Action has commenced to recover the amount - $0.1 million.

Benefit potentially receivable in relation to Supreme Court action involving Fobbing Hall Pty Ltd - $0.1 million.

36 EVENTS OCCURRING AFTER THE END OF THE REPORTING PERIOD

As part of the Machinery of Government reform, effective from 1 July 2017 the Department of Environment Regulation will amalgamate with the Department of Water and the Office of the Environmental Protection Agency forming a new Government Entity to be known as the ‘Department of Water and Environmental Regulation’. A budgeted item of $0.1 million has been included.

37 EXPLANATORY STATEMENT

All variances between estimates (original budget) and actual results for 2017, and between the actual results for 2017 and 2016 are shown below. Narratives are provided for selected major variances, which are generally greater than:

5% and $1.3 million for the Statements of Comprehensive Income and Cash Flows; and

5% and $1.2 million for the Statement of Financial Position.

TOTAL EQUITY 49,004 72,956 63,944 64,580 6,068

Major Estimate and Actual (2017) Variance Narratives

1) Other current assets are under budget by $1.7 million (97.8%) mainly due to the budget classification of accrued revenue allocated in the Receivables - refer to Note 21.
2) Intangible Assets are under budget by $1.4 million (73.8%) mainly due to the delays to the software capitalisation program that support the Industry Licensing and Compliance and Enforcement.
3) Current provisions are over budget by $2.3 million (57.2%) mainly due to under estimated calculation assumptions regarding long service leave.
4) Current provisions are over budget by $2.3 million (57.2%) mainly due to under estimated calculation assumptions regarding long service leave.
5) Other current liabilities are under budget by $1.7 million (61.2%) mainly due to unearned revenue from industry licence collections.

(a) Budgeted items within the above Payments differ from the published Budget Paper estimates, to better align some line item Estimates with the way the budget is prepared. For the year ended 30 June 2017

Major Estimate and Actual (2017) Variance Narratives

1) Distribution to owners was under budget by $3.4 million (9.4%) mainly due to landfill levy receipts being lower than estimated.
2) Supplies and services was under budget by $1.9 million (17.8%) mainly due to budget being overestimated for the year.
3) Grants and subsidies was under budget by $1.7 million (57.2%) mainly due to a reduction in the amount of landfill levy cash received in the year and an increase in industry licence capitalisations.
4) Grants and subsidies decreased by $2.7 million (30.1%) mainly due to the delay in the WARR Account programs - Refer to Note A above in the 'Statement of Comprehensive Income'.
Financial instruments held by the Department are cash and cash equivalents, restricted cash and cash equivalents, receivables, and payables. The Department has limited exposure to financial risks. The Department’s overall risk management program focuses on managing the risks identified below.

Credit risk
Credit risk arises when there is the possibility of the Department’s receivables defaulting on their contractual obligations resulting in financial loss to the Department.

The maximum exposure to credit risk at the end of the reporting period in relation to each class of recognised financial assets is the gross carrying amount of those assets inclusive of any allowance for impairment as shown in the table at note 38(c) ‘Financial instrument disclosures’ and note 21 ‘Receivables’.

Credit risk associated with the Department’s financial assets is minimal because the main receivable is the amounts receivable for services (holding account). For receivables other than government, the Department trades only with recognised, creditworthy third parties. The Department has policies in place to ensure that sales of products and services are made to customers with an appropriate credit history. In addition, receivable balances are monitored on an ongoing basis with the result that the Department’s exposure to bad debts is minimal. At the end of the reporting period there were no significant concentrations of credit risk.

Liquidity risk
Liquidity risk arises when the Department is unable to meet its financial obligations as they fall due.

The Department is exposed to liquidity risk through its trading in the normal course of business.

The Department has appropriate procedures to manage cash flows including drawdown of appropriations by monitoring forecast cash flows to ensure that sufficient funds are available to meet its commitments.
### Notes to the Financial Statements

For the year ended 30 June 2017

c) Financial instrument disclosures

Credit risk

The following table details the Department’s maximum exposure to credit risk and the ageing analysis of financial assets. The Department’s maximum exposure to credit risk at the end of the reporting period is the carrying amount of the financial assets as shown below. The table discloses the ageing of financial assets that are past due but not impaired and impaired financial assets. The table is based on information provided to senior management of the Department.

The Department does not hold any collateral as security or other credit enhancement relating to the financial assets it holds.

Fair values

The financial assets and liabilities recognised in the Statement of Financial Position, whether they are carried at cost or fair value, are recognised at amounts that represent a reasonable approximation of fair value unless otherwise stated in the applicable notes.
NOTES TO THE FINANCIAL STATEMENTS
For the year ended 30 June 2017

39 REMUNERATION OF AUDITOR

Remuneration paid or payable to the Auditor General in respect of the audit for the current financial year is as follows:

40 RELATED AND AFFILIATED BODIES

The Department does not provide any assistance to other agencies which would deem them to be regarded as related or affiliated bodies under the definitions included in Treasurer's Instruction 951.

41 SPECIAL PURPOSE ACCOUNTS

Contaminated Sites Management Account

The purpose of the account is to enable investigation or remediation of any site where the State or a public authority (excluding Local Government) is responsible for remediation. The account also funds the Department’s costs of investigation and ensuring compliance with notices.

43 SUPPLEMENTARY FINANCIAL INFORMATION

(a) Write-offs

The Department had one minor write-off of $1.30 (2016 - $276) for underpayment of invoices during the financial year.

(b) Losses through theft, defaults and other causes

The Department had no losses through theft, defaults and other causes during the financial year.

(c) Gifts of public property

The Department had no gifts of public property during the financial year.

</tr>
</tbody>
</table>

Major Estimate and Actual (2017) Variance Narratives

1) Regulatory fees and fines was over budget by $39k (130%) due to modified penalties issued in the year. 3 modified penalties produced the majority of revenue in 2016-17 which was above the estimate for the year.

2) Transfer payments over budget by $39k (130%) - refer to 1 above. All of the above income received, being administered on behalf of Government, was transferred by the Department to the Consolidated Account.

Major Actual (2017) and Comparative (2016) Variance Narratives

A) Regulatory fees and fines decreased by $120k (64%) mainly due to revenue from 3 modified penalties in the year compared to 8 modified penalties in 2016.

B) Transfer payments decreased by $120k (64%) - refer to A above. All of the above income received, being administered on behalf of Government, was transferred by the Department to the Consolidated Account.
Certification of Key Performance Indicators

I hereby certify that the key performance indicators (KPIs) are based on proper records, are relevant and appropriate for assisting users to assess the Department of Environment Regulation’s (DER) performance, and fairly represent the performance of the Department for the financial year ended 30 June 2017.

Amanda Alderson
Reporting Officer
12 October 2017

Outcomes and key effectiveness indicators

The outcomes-based management structure and key performance indicators are reported in The Government of Western Australia Budget Statements 2016–17 Budget Paper No. 2 Volume 2.

Relationship to government goals

Broad government goals are supported at agency level by specific outcomes. Agencies deliver services to achieve these outcomes. The following table illustrates the relationship between the Department’s services and desired outcomes, and the government goal it contributes to. The key effectiveness indicators measure the extent of impact of the delivery of services on the achievement of desired outcomes. The key efficiency indicators monitor the relationship between the service delivered and the resources used to produce the service.

</tbody>
</table>
1.1 Percentage of major resource project works approvals and licences applications decided within 60 working days.

The performance indicator is in place to ensure the effective delivery of environmental regulation services to industry. Major resource projects are given priority within the Department to ensure that applications are determined in a reasonable timeframe.

A major resource project is defined as any project determined to be a ‘State Development Portfolio Project’ by the former Western Australian Department of State Development.

The Department employs a “stop-the-clock” approach in the following cases:

- Waiting on the applicant for fee payment.
- The applicant requests the application be put on hold.
- The application is subject to Environmental Protection Authority referral and assessment.
- Decision on the application is pending a further approval (for example planning approval).

Outcome: Emissions, discharges and clearing of native vegetation are effectively regulated to avoid unacceptable risks to public health and the environment

The Department measures and reports its effectiveness with reference to the time taken to make a determination to grant or refuse regulatory instruments. The time taken to grant or refuse is important to achieving our outcome because it indicates how effective the Department is in its delivery of services and its accessibility to clients. This is within the context of the assessment of applications being conducted in accordance with the requirements of the EP Act, and published guidance such as the Department’s Regulatory Framework. By measuring against a benchmark of 60 days, the effectiveness of the regulation of emissions, discharges and clearing of native vegetation by the Department can be determined over time.

Decisions to grant or refuse a regulatory instrument are open to appeal by the applicant and third parties, providing assurance that works approvals, licences and clearing permits effectively regulate risks to public health and the environment.

Note to indicator: The percentage of applications finalised within 60 working days between 2016–17 (67%) and 2015–16 (87%), which is below the Department’s target of 100%, is primarily due to the inadequacy of the licensing business system requiring separate manualised data capture, and significant resourcing issues during these years. Review of the processes and procedures, including the development of appropriate business systems will be a focus for the DWER in the upcoming financial year.

The ‘Actual’ figure reported for 2015–16 was 79% and has now been recalculated following the definition of a ‘major project’ being updated to be consistent with other government departments.

(1) The ‘Actual’ figure reported for 2015–16 was 79% and has now been recalculated following the definition of a ‘major project’ being updated to be consistent with other government departments.
1.2 Percentage of other project works approvals and licences applications decided within 60 working days.

The performance indicator is in place to ensure the effective delivery of environmental regulation services to industry. Other project works are defined as any project work approval that is not a major resource project as defined above. Projects other than major resource projects are to be determined within the same timeframe where possible, with an 80% completion.

The Department employs a “stop-the-clock” approach as described above.

**Note to indicator:** The percentage of applications finalised within 60 working days between 2016–17 (69%) and 2015–16 (69%), which is below the Department’s target of 80%, is primarily due to the inadequacy of the licensing business system, and significant resourcing issues during these years. Review of the processes and procedures, including the development of appropriate business systems, will be a focus for the DWER in the upcoming financial year.

1.3 Percentage of native vegetation clearing permit applications decided within 60 working days.

The performance indicator is in place to ensure the effective delivery of the regulation of clearing of native vegetation.

The Department employs a “stop-the-clock” approach as described above.

**Note to indicator:** The improved result between 2016–17 actual (68%) and the 2015–16 actual (77%) is due to an increase in the number of matters under investigation received in 2016–17 compared to 2015–16. The volume of matters under investigation increased to 3,382 in 2016–17 compared to 3,033 in 2015–16.

1.4 Percentage of investigations finalised within 60 working days.

The Department investigates complaints and associated breaches of the EP Act and associated legislation. Ensuring complaints and associated breaches are investigated and addressed in a timely manner is key to effective regulatory delivery.

**Note to indicator:** The target of 80% was not achieved in 2016–17 due to an increased volume of investigations in the reporting period and constrained resources to undertake the investigations.

2.1 Percentage of advice and recommendations that met Ministerial approval, without the need for significant modification.

The Department provides policy advice to the Environment Minister as the decision-maker. The satisfaction of the Environment Minister with the policy advice measures the extent to which the Department’s advice contributes to the Government’s sustainable environmental policy outcomes.

**Outcome:** Development and implementation of strategic policy and legislation that promoted sustainable environmental outcomes

---

(2) The ‘Actual’ figure reported for 2015–16 was 66% and has now been recalculated following the definition of an ‘other project’ being updated to be consistent with other government departments.

(2) A revised methodology has been implemented which accurately captures matters being investigated by the Department. The ‘Actual’ figure reported for 2015–16 is 96% and has now been recalculated using the revised methodology.

(1) The ‘Actual’ figure reported for 2015–16 was 43% which was originally based on calendar days; however, this has now been recalculated based on working days as per the approved key performance indicators.
Disclosures and legal compliance

The data used to calculate these indicators are based on the Recycling Activity in Western Australia 2015–16 report. These annual reports allow comparison of performance across years.

3.1 Percentage of municipal solid waste reported as diverted from landfill through recycling compared to the waste strategy target in the Perth metropolitan region.

Note to indicator: Municipal solid waste includes construction and demolition waste generated by local governments. The variance between 2016–17 actual (36%) and the 2015–16 actual (40%) is due to a reduction in construction and demolition materials reported as recovered from municipal solid waste. This was partially offset by a reduction in waste disposed of to landfill compared to that reported in 2015–16. Local government uncertainty following the discontinuation of local government amalgamations affected regional local governments’ long-term planning and decisions about investment in improved mixed waste processing, and the recovery of materials from municipal solid waste (WALGA, Lessons Learnt: Metropolitan Local Government Reform June 2016).

3.2 Percentage of commercial and industrial waste reported as diverted from landfill through recycling compared to the statewide waste strategy target.

Note to indicator: The variance between 2016–17 actual (56%) and the 2015–16 actual (52%) is due to an increase in commercial and industrial waste reported as recovered and therefore diverted from landfill. This continues a trend of improved performance.

3.3 Percentage of construction and demolition waste reported as diverted from landfill through recycling compared to the statewide waste strategy target.

Note to indicator: The variance between 2016–17 actual (57%) and the 2015–16 actual (42%) is due to a reduction in construction and demolition waste reported as disposed of to landfill and therefore diverted from landfill. Note that the key performance indicator is a stand-alone percentage reflecting the waste strategy target and is not a proportional measure of the extent to which the target has been met.

Outcome: Waste avoided and the recovery of materials from landfill maximised
Key efficiency indicators

Service 1: Environmental regulation

1.1 Average Cost per Works Approval and Licence Application.

Assessment and decision-making on works approval and licence applications under Part V Division 3 of the EP Act constitutes a significant proportion of the Department’s environmental regulation service. This indicator measures the efficiency of the Department’s service delivery in assessing works approval and licence applications.

Note to indicator:
Actual 2016–17 v Actual 2015–16
The higher Average Cost per Works Approval and Licence Application between 2016–17 and 2015–16 actuals is mainly due to the complexity and lower number of approvals and applications processed.

Actual 2016–17 v Target 2016–17
The higher Average Cost per Works Approval and Licence Application between 2016–17 Actual and 2016–17 Target is mainly due to the lower number of approvals and applications processed, reduced staffing numbers, and the complexity associated with processing of the new licence amendment instrument.

1.2 Average Cost per Native Vegetation Clearing Permit Application.

Assessment and decision-making on native vegetation clearing permit applications Part V Division 2 of the EP Act constitutes a further substantial proportion of the Department’s environmental regulation service. This indicator measures the efficiency of the Department’s regulatory service delivery in assessing clearing permit applications.

Note to indicator:
Actual 2016–17 v Actual 2015–16
The higher Average Cost per Native Vegetation Clearing Permit Application between 2016–17 and 2015–16 actuals is mainly due to a higher number of clearing permits and increased allocated costs.

Service 2: Environment policy

2.1 Average Cost per Hour of Policy Advice and Recommendations.

This indicator reflects the development, review and amendment of environmental policy, national policy, primary and subsidiary legislation, and environmental programs, providing advice to the Environment Minister and preparing submissions on behalf of the Minister and the Government relating to legislation administered by the agency. The calculation is based on total contract hours for service for full-time employees.

Service 3: Waste strategies

3.1 Cost of landfill levy compliance as a percentage of landfill levy income collected.

The Department undertakes a number of activities to ensure industry compliance with landfill levy requirements including: the administration of landfill levy returns; auditing of those returns; processing of exemptions; and undertaking inspections at a range of waste facilities. Unauthorised waste activity investigation is also a significant component of this work stream. The total cost of these services together with supporting functions and corporate overheads is then compared with the total landfill levy income collected for the financial period.

Note to indicator:
Actual 2016–17 v Actual 2015–16
The cost of landfill levy compliance as a percentage of landfill levy income collected between 2016–17 and 2015–16 actuals has reduced due to higher levy income collections and lower compliance activity costs in 2016–17.

Note to indicator:
Actual 2016–17 v Target 2016–17
The cost of landfill levy compliance as a percentage of landfill levy income collected is lower than targets mainly due to lower compliance activity costs than budgeted amount in 2016–17.
Ministerial directives

No ministerial directives were received during the financial year.

Other financial disclosures

Pricing policies of services provided

The Department charges fees for industry licensing arrangements on a cost-recovery basis.

These licensing arrangements include assessment and decision-making on works approvals and licence applications; administration of licences; inspection and auditing of licensed premises; compliance and enforcement action; and specialist technical services which support these processes.

Capital works

The Department has an asset investment program which is focused on information communications and technology, and plant and equipment. The capital expenditure is primarily for information technology assets, environmental assets, office equipment, plant and equipment, and computer software. Capital expenditure of $622,000 was incurred during 2016–17 against a budget of $885,000. The under-spend was due to timing of asset investment.

Workforce planning

In 2016–17, the Department progressed implementation of the Workforce and Diversity Plan 2015–2018. This plan aims to set the strategic direction for achieving current and future needs, provide for a diverse workforce, and meet statutory obligations.

During the reporting period, cultural challenges within the Department were identified arising from feedback from the 2015 Public Sector Commission’s (PSC) Employee Perception Survey, a preliminary investigation by PSC into these findings, and an agency commissioned external review. A Workforce Strategic Outline, aligned to the five strategic objectives of the existing Workforce and Diversity Plan, resulted from these reviews incorporating the following objectives:

- Supporting the workforce
- Attracting and retaining a skilled and diverse workforce
- Developing leadership capability
- Building the capacity and flexibility of our workforce
- Building a values-based culture
Staff development

The focus for the reporting period was implementing the organisational development priorities specified in the Workforce Strategic Outline 2017–2018.

A number of wellness and wellbeing initiatives were delivered to provide support to staff in leading self and others positively during times of changes. These sessions were supported through lunch and learn seminars covering a range of wellness and wellbeing related topics.

The Department’s Leadership and Management Program was implemented during the reporting and incorporated an Executive Leadership Development Program, Management Essentials training, Executive and Management Coaching Program, and the development of leadership and management learning circles aimed at providing opportunities for peer support and to promote the sharing of information and experiences.

The Department’s Core Capability Training Program continued to be delivered with the objective of building capability in an applied learning environment. The focus area was upskilling internal subject matter experts who developed and delivered operational-specific training across a range of areas, including industry regulation and environmental sciences.

The Department’s Corporate Leadership Group (CLG) moved into its third year of operation and continued to provide input and advice into current and future strategic initiatives. The forum provides a structured opportunity for applied leadership development at all levels across the Department, and in 2016–17 the CLG championed initiatives such as the Planning Forum, the Leadership Speaker Series, and coordinated the staff survey. Members of the CLG were recognised for their contribution at the Graduation and Awards Ceremony attended by the former Environment Minister.

During 2016–17, the Department hosted an Aboriginal Trainee as part of PSC’s Aboriginal Traineeship Program.

During 2016–17, two workers’ compensation claims were recorded. The workers’ compensation contribution was $68,548.00 (excluding GST) for the financial year.

No lost time injuries were reported.

Unauthorised use of credit cards (personal use)

During 2016–17, there were eight instances where the Western Australian Government Purchasing Card was used for personal use. The aggregate amount of personal use expenditure was $325. All expenditure was recovered by 30 June 2017. No disciplinary actions were instigated by the notifiable authority during the reporting period.

Contracts with senior officers

At the date of reporting, no senior officers, or firms of which senior officers were members, or entities in which senior officers had substantial interests, had any interests in existing or proposed contracts with the Department other than normal contracts of employment.

Insurance premiums paid to indemnify any director

The Department does not pay separate directors’ and officers’ insurance to indemnify any director.

Members of the Waste Authority, Cockburn Sound Management Council, the Contaminated Sites Committee, and the Office of the Appeals Convenor are covered under the Department’s normal insurance.

The Department’s insurance covers the personal liability of employees, volunteers, work experience persons, and officers of the Department while acting in their official capacity, performing a statutory function, or performing a function or task which has been requested by a Minister or Public Authority.

Specifically excluded is the personal liability to the Department of any director or officer arising out of their gross negligence, misconduct, bad faith, or breach of duty imposed by the Statutory Corporations (Liability of Directors) Act 1996.
Other legal requirements

Disability Access and Inclusion Plan (DAIP) outcomes, Disability Services Act 1993, s.29

During the 2016–17 reporting period, the Department lodged the inaugural Disability Access and Inclusion Plan 2016–2020 with the Disability Services Commission.

The Department undertook the following actions in 2016–17:

Outcome 1

People with disability have the same opportunities as other people to access the services of and any events organised by the Department.

Departmental staff who organise events/public consultation were made aware of the interim DAIP and their responsibilities associated with the plan. The plan was made available on the Department’s intranet and staff were advised via broadcast email. During the reporting period, the Department’s induction and foundation training programs were revised to include disability awareness training.

Outcome 2

People with disability have the same opportunities as other people to access the buildings and other facilities of the Department.

During 2016–17, the Department reviewed and maintained modifications to the main reception area and public administration centre counters to ensure they remained accessible to people using wheelchairs and people of short stature.

The Department also ensured signage with clear lettering contrast was provided, and parking provisions met the needs of people with disability in terms of quantity and location.

Advertising (Electoral Act 1907, s. 175ZE)

In 2016–17, the Department spent a total of $248,477 on advertising.

Outcome 3
People with disability receive information from the Department in a format that will enable them to access the information as readily as the general population.

To ensure accessibility to content meets the Web Content Accessibility Guidelines (WCAG) standard, the Department maintained a contemporary good practice approach to website content management. Departmental publications were produced in accordance with the Western Australian State Government’s Access Guidelines, and included a statement they were available in alternative formats on request.

Outcome 4
People with disability receive the same level of quality of service from staff of the Department as the general population.

Accessibility considerations, included in information about the Department’s obligations as a State Government organisation, are provided as part of the induction of new employees. During 2016–17, the Department’s induction and foundation training programs were reviewed to include Disability Awareness Training. In addition, the provision of Disability Awareness Training was communicated to staff via the Department’s Workforce and Diversity Plan 2015–2018.

Outcome 5
People with disability have the same opportunities as the general population to make complaints to the Department.

During 2016–17, the Department continued to implement the Customer Service Charter and the mechanisms for capturing and monitoring complaints through the online feedback form. The Department is also able to receive complaints from the public via telephone, written correspondence, and in person. These options are offered at a reasonable standard of accessibility.

Outcome 6
People with disability have the same opportunities as other people to participate in public consultation by the Department.

The Department carries out public consultation to gain the views of all stakeholders and interested parties to inform a transparent and accountable decision-making process. During the reporting period, considerable work was done to improve the Department’s public consultation content on the website, which meets the WCAG standards of accessibility.

In addition to the web content, the public can consult the Department by way of:

- phone;
- email;
- hard copy submission; or
- attending public meetings.

The public may also access Department staff at two metropolitan and five regional offices.

Outcome 7
People with disability have the same opportunities as other people to obtain and maintain employment with the Department.

During 2016–17, the Department ensured assistive technologies were provided with staff that required them, and flexible working arrangements were considered on a case-by-case basis for people with disability.

In addition, the Department continued to liaise with existing Disability Service Providers and ensured a Substantive Equality Statement appeared in all advertised vacancies.
### Compliance with public sector standards and codes of ethics

### Recordkeeping plans, *State Records Act 2000*, s.61 State Records Commission standards

As required by all State Government organisations under s.23 of the *State Records Act 2000*, the Department’s Recordkeeping Plan was submitted to the State Records Commission (SRC) and approved by the Commissioner on 20 March 2015.

The plan demonstrates progress towards better practice recordkeeping and compliance with the minimum requirements of SRC Standard 2: Recordkeeping Plans and SRC Standard 6: Outsourcing.

Mandatory records and document management training for employees is part of the Department’s induction process. Recordkeeping roles and responsibilities are also included in the Department’s Records Management Policy, Code of Conduct, and AEDM training.
Government policy requirements

► Substantive equality

The Department is named on the Equal Opportunity Commission’s list of agencies required to continue implementing the Policy Framework for Substantive Equality.

The Department continued to receive bureau services from the former Department of Parks and Wildlife (Parks and Wildlife) during 2016–17 for corporate services, and the obligations under the Policy Framework for Substantive Equality were met by Parks and Wildlife’s performance in this area.

► Occupational safety, health and injury management

The Department, through its commitment to providing, developing and maintaining a safe working environment, is continuing to:

- meet its obligations within the *Occupational Safety and Health Act 1986* and the *Workers’ Compensation and Injury Management Act 1981*;
- receive occupational safety and health (OSH) and injury management support, including the development of return to work plans, from Parks and Wildlife through bureau services; and
- develop and implement transitional arrangements for its internal OSH capability through an OSH Committee, safety management system, operational guidelines, and work practices.

All departmental employees have an obligation to take their responsibilities for OSH and injury management seriously in order to establish and maintain a safe and healthy workplace. The Department’s executive and senior management remain committed to delivering leadership and compliance to applicable standards of OSH for all employees.

During the reporting year, the Department carried out the following:

- Elected safety and health representatives and employee representatives from each workplace to facilitate effective communication and consultation between the employer and employees in relation to safety and health matters. Employee representatives reached agreement as to the membership and function of the Department’s OSH Committee which will exercise its functions across all departmental workplaces. The establishment of the OSH Committee will enable and assist consultation and cooperation between management and employees in relation to safety and health issues. The OSH Committee will support and advise the Department’s Corporate Executive in the development, maintenance and continuous improvement of safety management systems and performance.
  - Provided training in first aid, OSH, and injury management obligations, as well as mandatory safety and health representative training.
  - Developed the Department’s draft Safety Management System.
  - Continued to operate a system of job safety analysis to all field officers.

### Measure | Actual results | Results against target
--- | --- | ---
| | 2014–15\(^{(1)}\) | 2016–17\(^{(1)}\) | Target | Comment on result |

| Number of fatalities | 0 | 0 | 0 | Target (0) achieved |
| Lost time injury and/or disease incidence rate | 0 | 0.66 | 0 or 10% reduction | Target (0) achieved |
| Lost time injury and/or disease severity rate | 0 | 0 | 0 or 10% reduction | Target (0) achieved |

| Percentage of injured workers returned to work: |
| (i) within 13 weeks | 100% | 100% | Greater than or equal to 80% | Target (100%) achieved |
| (ii) within 26 weeks | 100% | 100% | Greater than or equal to 80% | Target (100%) achieved |

| Percentage of managers trained in occupational safety, health and injury management responsibilities | n/a\(^*\) | 80%\(^*\) | Greater than or equal to 80% | Target (80%) achieved |

\(^*\) Trained within the last three years in accordance with PSC’s Circular 2012-05. Development of the Department’s OSH training program commenced in 2014–15 and was implemented in the reporting period 2015–16.

\(^{(1)}\) This indicator examines a three-year trend and, as such, the comparison base is to be two years prior to the current reporting year.
