TechnologyOne 2017A Upgrade Release Notes

More significant fixes applicable to TAFE WA SMS
- SMS-41641 - Performance has been improved when retrieving a large amount of students from the Students Ci Anywhere enquiry screen.
- SMS-45209 - The performance is improved on the Student Search when a student ID is directly entered as criteria without using natural language.
- SMS-49076 - Error code 500 is received in Student Overview
- SMS-46891 - Amend SSPC message displayed is based on the associated SSPC status so it does not mislead students
- SMS-42773 - The 'Coursework Summary' section of the Student Overview screen in Ci Anywhere now includes the Grade Description.
- SMS-42735 - When adding other contact details for a student the address fields are now mandatory.
- SMS-42703 - When an applicant clicks on the 'Logon' button from the applicant registration screen (and standard authentication is not being used), the applicant is now re-directed to the Student Portal log in screen instead of the staff log in screen.
- SMS-41273 - An applicant or student is now able to change an address that was previously entered.
- SMS-40888 - The Applicant Registration Confirmation email, which is generated when an applicant registers themselves from the Applicant Portal, now correctly produces the output file according to the Output File Type from the Correspondence Definition.
- SMS-41806 - When a student is created from the Applicant Registration screen or Application Data Entry screens in Ci Anywhere, or an existing name is subsequently updated in Ci Anywhere, the student names now correctly update the uppercase name columns as expected.
- SMS-40863 - The 'Year' fields in the Education Background section of the Make an Application screen in Ci Anywhere have been updated to ensure that they only accept valid year values.
- SMS-38440 - When creating a student as part of an application using the Application Data Entry screen, leaving the 'Gender' field blank now correctly sets the value so that downstream data checks continue to operate as expected.
- SMS-38424 - When entering an address in the Applicant Portal or Student Portal, the dropdown for 'State' now respects whether the state has the 'Web Access' flag checked in the Country States Ci function.
- SMS-49014 - Overseas address - city/town, state and postcode should be mandatory/non mandatory when creating and updating
- SMS-48703 - Content of 'Terms and Conditions' will be displayed as a pop up on applicant portal.
- SMS-47585 - A new configuration field has been added to Ci Anywhere to specify the maximum number of units that can be enrolled in at the same time.
- SMS-47223 - When registering as a new student, the registration will be prevented if the email address already exists (regardless of the casing used).
- SMS-44651 - Nationality can automatically be set from the Citizenship by enabling an option from the Student Administration Configuration screen.

- SMS-39483 - The 'Register as a New Student' text in the Applicant Registration page is now configurable. It is controlled by the 'Registration Details Heading' in the 'Student Application Registration' section of the 'Admissions and Enrolments Configuration' screen.
- SMS-26115 - The student profile screen has consolidated 'other contacts' in with email, phone and email contacts to simplify the user interface. In addition, access restrictions for the standard code values are now referenced.

Other fixes applicable to TAFE WA SMS
- SMS-48071 - Using search criteria for Student ID in the Student Engagements enquiry is returning the student specified.
- SMS-47482 - Actions are duplicated when a browser timeout occurs during processing.
- SMS-48500 - Student Analysis: 'Student Form Response' search parameter returns correct data.
- SMS-48843 - CiA My Academics does not display data in Student Summary.
- SMS-48836 - Generated correspondence output is in correct format.
- SMS-47067 - Permission to view and edit Student Alternate Identifiers is now being respected in Application Data Entry and Student Profile.
- SMS-47056 - The Gender standard code now respect the Student Access restriction if it has been configured.
- SMS-45523 - In the Contact Student screen / Correspondence to the Student section, the Cc field is not being populated with the existing alternate address of the Student.
- SMS-43861 - When searching for a student using the Academic - Students enquiry, the citizenship filter can be expanded showing the correct results according to the search criteria applied.
- SMS-43695 - When a student does not have Authorisation 152 they will not be able to activate or deactive their contact details.
- SMS-43651 - Custom Fields In the Summary Section of My Details remain visible and do not disappear when other fields are changed.
- SMS-43062 - When sending correspondence to a student where a 'Temporary Preferred Address' is in place, the correspondence now correctly sends to the temporary address rather than the standard preferred address.
- SMS-42838 - The 'Associated Users' tag against the User Accounts section of an Organisational Unit now references the number of active users for that Organisational Unit.
- SMS-42605 - SMS Messaging Gateway Address - Mobile Number placeholder is populating students Email Address.
- SMS-42604 - SMS Messaging Gateway Address - System Variable still being used instead of Correspondence Configuration.
- SMS-42521 - When an applicant registers themselves using the Applicant Portal, a registration acknowledgement screen is now shown advising that they will receive an email with their registrations details.
- SMS-42389 - When looking at the Student's My Tasks screen from a staff's login, the Student Id was not correctly being passed through so more tasks were showing than what the student actually had.
- SMS-42220 - Alternate IDs for a student within the Student Portal now respects the 'Student Access' settings against the standard code type to allow customers to determine whether the values can be viewed or changed by a student.
- SMS-42062 - The User Search dropdown list used when adding users to an Organisational Unit has been updated so that a user is able to search on User ID. In addition, we have enhanced the display and searching capabilities when using advanced search.

- SMS-42013 - The 'Year 12 School' field in the Education Background of the Student Profile screen now only shows active external organisations that match the type specified in the 'S1_EAP_YR12_ORG_CD' system variable.
- SMS-41618 - The link to the Student Overview function from the Students enquiry now operates as expected.
- SMS-41335 - Customers using TechnologyOne standard authentication can enable the 'Copy Student's Preferred Email to User Primary Email' Site Configuration field so that students can log in with their email. This will copy their email when updated, or they register.
- SMS-40542 - As a staff user, Attachments (including in Document Requirements), Comments and Student Correspondence (in Communication History) in Ci Anywhere screens now include audit details to know if a record has been modified since it was first created.
- SMS-40351 - Name Effective Date warning is no longer being displayed to the registered applicant when they change their name details at a later date.
- SMS-40348 - The display of Requirement details section in Wide Screen mode now works properly in IE.
- SMS-39804 - When using an email message template within an application acknowledgement correspondence definition, a student will now successfully receive the email without an error being displayed in the applicant registration screen.
- SMS-38426 - When the 'Address Type to Create' field is defined in the Admissions and Enrolments Configuration screen, when an applicant address is created, the applicant no longer receives an application error when an applicant address is created.
- SMS-37368 - A duplicate key error no longer displays to the student upon offer acceptance if that student already has the Student Portal role (not the Applicant Portal role) that will be associated to the student when they accept their offer.
- SMS-37363 - Student alternate identifiers can now hold up to 50 characters (previously was 20 characters).
- SMS-48521 - The error 'Location calendar does not exists' should not be presented to a students, instead study period drop-down list should not contain any records for selection

General enhancements by TechnologyOne that also assist TAFE WA SMS
