Progress report

Local governments' four yearly inspections of private swimming pool safety barriers

2020/21

BUILDING COMMISSIONER'S FOREWORD

I am pleased to present the annual *Progress report - Local governments' four yearly inspections of private swimming pool safety barriers 2020/21* (Report). The Report details individual local government private swimming pool safety barrier inspection figures for the 2020/21 period, as voluntarily reported by those local governments.

Drowning of young children is preventable, yet remains one of the leading causes of accidental death for young children, with swimming pools generally being the main water body involved. While adult supervision within arm's reach is the most effective way to prevent these drowning incidents, mandatory pool safety barriers, local government inspections and public education are extremely important in the overall strategy to prevent or reduce these tragedies. The results of these efforts can be seen in the [Royal Life Saving National Drowning Report 2020](#), which showed that there were zero toddler drowning deaths in Western Australia in 2019/2020. While this is an amazing result, it is important that we do not become complacent.

Safety barrier inspections, carried out by local governments, help ensure that safety barriers remain compliant and are being maintained properly. They also serve as an important reminder for pool owners of their responsibilities. These inspections are an important task and I commend local governments for their efforts.

In recent times, due to COVID-19, the ability of local governments to conduct these inspections has been difficult. I am pleased that local governments have been able to persevere through these difficulties to continue this important work.

While this Report shows a low percentage of overdue inspections, there remains room for improvement. It is disappointing that 14 local governments did not provide data and that some of those that did reported significant numbers of overdue inspections. I remain confident that these local governments will do their best to improve and hope that the continued public reporting of this information will help encourage this.

Kristin Berger
Building Commissioner

EXECUTIVE SUMMARY

This Report has been prepared by the Department of Mines, Industry Regulation and Safety - Building and Energy Division (Building and Energy).

Pool safety barriers are known to be effective in helping to restrict the unsupervised access of young children into swimming pool areas, reducing the likelihood of a drowning incident.

Local governments are required to inspect the safety barriers of private swimming pools within their district at intervals not exceeding four years. These inspections monitor the compliance of those safety barriers. Local governments have powers under the *Building Act 2011* to assist them enforce compliance.

Local governments were formally requested to voluntarily provide data on their pool safety barrier inspection progress in June 2021. An early notification email was sent in March, and a reminder email in July. The due date was 2 August 2021. Some responses were received after this date and have been included in the Report.

Of 139 local governments in Western Australia, 125 provided a response prior to the preparation of this Report. Unless otherwise noted, where a local government's data was not received it has been recorded in the Report as 'Data not provided by deadline'.

This Report is the third annual report on the progress of local governments' pool inspection programs and is in response to recommendation 7 of the Ombudsman WA report [*Investigation into ways to prevent or reduce deaths of children by drowning*](#), tabled in Parliament on 23 November 2017. A report for the 2019/20 period was not published due to the impact of COVID-19 on local governments' ability to conduct inspections.

Building and Energy is currently undertaking a review of the regulatory requirements for pools and their safety barriers. It is anticipated that the provision of the data presented in this Report will become a mandatory requirement for local governments.

Some local governments, in their responses, detailed reasons why some inspections had not been conducted within the four year maximum. These included:

- the impact of COVID-19 on their ability to inspect;
- difficulties in organising access to some properties; and
- staff resourcing.

Summary	2020/21	2018/19	2017/18
Total number of pools	166,709	161,960	159,183
Total number pools overdue	2,673	2,545	3,632
Total pools overdue %	1.6%	1.6%	2.3%
Local governments with overdue inspections	54	40	44
Local governments that did not provide data	14	17	20
